Dome tent Diameter 5m	19.63m	3.1m	26*1.5mm	Customized
Dome tent Diameter 6m	28.26m	3.5m	26*1.5mm	Customized
Dome tent Diameter 8m	50.24m	4.5m	32*1.5mm	Customized
Dome tent Diameter 10m	78.5m	5.5m	32*1.5mm	Customized

Place of Origin	Guangdong, China.
Cover Material	High-grade PVC Coated Polyester Fabric.
Feature	Long Lifespan, Waterproof, UV resistant, Fire Retardant.
Max. Windload	120 km/h
Max. Snowload	75kg/sqm
Certificate	CE,SGS
Application	Hotel, Campsite, Resort, Outdoor Living

The installation process:

Site Preparation:

Select a suitable location for the dome tent, considering factors such as level ground, drainage, and proximity to amenities. Clear the area of any debris, rocks, or sharp objects that could damage the tent floor or obstruct setup.

Layout and Positioning:

Lay out the components of the dome tent, including the tent fabric, poles, stakes, and guy lines. Position the tent fabric in the desired location, ensuring it is oriented correctly according to the entrance and ventilation openings.

Assemble the Frame:

Begin by assembling the frame of the dome tent according to the manufacturer's instructions. Connect the tent poles and secure them in place, ensuring that they are properly aligned and tensioned to form the dome shape.

Attach the Tent Fabric:

Once the frame is assembled, drape the tent fabric over the frame, starting from one side and working your way around. Secure the fabric to the frame using Velcro straps, clips, or other attachment mechanisms provided by the manufacturer.

Secure the Tent:

Stake down the corners of the tent fabric to anchor it to the ground and prevent movement in windy conditions. Use guy lines attached to the tent frame to provide additional stability and tension, especially at key points such as the apex of the dome.

Install Additional Features:

Install any additional features or accessories included with the tent, such as rainflies, vestibules, or ground tarps, as needed. Test the functionality of doors, windows, and ventilation openings to ensure they operate correctly and provide adequate airflow.

Final Adjustments:

Perform a final inspection of the tent to ensure that all components are properly assembled and secured. Make any necessary adjustments to the tension of the tent fabric, guy lines, or stakes to achieve optimal stability and weather resistance.

Safety Checks:

Conduct safety checks to ensure that the tent is set up correctly and meets relevant safety standards and regulations. Address any potential hazards or concerns, such as tripping hazards, sharp edges, or unstable anchoring points.

Completion and Cleanup:

Once the tent is fully installed and secured, complete any remaining tasks such as installing flooring, interior furnishings, or signage. Remove any debris or waste generated during the installation process and ensure that the site is left clean and tidy.

Final Inspection:

Conduct a final inspection of the tent to verify that it meets all requirements and is ready for use. Address any issues or deficiencies identified during the installation process to ensure the safety and comfort of guests.

FQA:

Q: Can you print our logos on the tent?

Yes. Customized logos can be printed on the tent fabric according to your requirements.

Q: Is that factory price?

Yes. We assure you all prices are based on factory.
