6	301sq.ft(28m2)	11.48ft.(3.5m)	450kg	1.8*0.66*0.86m					
7	414sq.ft(38.46m2)	13ft.(4m)	500kg	1.8*0.7*0.86m					
8	538sq.ft.(50m2)	15ft.(4.68m)	520kg	1.8*0.8*0.8m					

Details :

Here are the characteristics of a Dome tent:

Dome Shape: Dome tents are named for their distinctive shape, which resembles a dome or half-sphere. This design offers several advantages, including efficient use of space, stability in windy conditions, and ease of setup.

Stability: Dome tents typically feature a freestanding design with multiple intersecting poles that create a stable framework. The curvature of the dome distributes wind forces evenly, making dome tents more resistant to gusts and inclement weather compared to other tent designs.

Easy Setup: Dome tents are known for their straightforward setup process. Most models utilize a simple pole system that can be assembled quickly, even by novice campers. This ease of setup makes dome tents a popular choice for weekend getaways and camping trips.

Lightweight and Portable: Dome tents are often constructed from lightweight materials such as polyester or nylon, along with aluminum or fiberglass poles. This lightweight construction makes dome tents easy to transport and ideal for backpacking or hiking adventures where weight is a consideration.

Interior Space: Despite their compact footprint, dome tents often provide ample interior space for sleeping and storage. The sloping walls of the dome shape maximize headroom near the center of the tent, allowing occupants to sit up comfortably and move around inside.

FAQ:

Q1. Are you factory or trade company?

We are direct factory.

Q2. What is your Payment terms?

T/T is available.

Q3. Is your tent strong and stable enough,How about the wind loading?

Yes,Steel structure and cover wind resistance and load bearing is calculated by professional software and Experience engineer team,will be more than we planned 50%.The wind load at least more than 120KM/H.

Q4. What's the material of the cover,does it can last long time?

The cover material is PVDF or PTFE.PVDF can last more than 15-20 years.PTFE can last more than 50 years.It have fabric inside,so it very strong,not easy to be torn.

Q5. When will you ship the orders?

Once the design of tent is confirmed,we will arrange production plan,and inform you of the leadtime.generally it takes about 7-25 working days.

Q6. What is the total price include freight?

The total price is based on the design of the product and the requirement of the customer,all subject to the final calculation.
