Product Description

Stage, Mobile Stage For Sale, Glass/Acrylic Aluminum Stage For Events Exhibition ,Wedding And So On

Product Description:

Material

*Aluminum alloy 6082-T6
*the frame deth is 60mm
*the frame height is 81mm

18mm Acrylic board

*high quality 18mm thickness Acrylic board
*load capacity > 750kg/m²

Adjustable legs

*safety pins to fix the adjustable leg
*stage leg with rulers
*Round/square leg optional

Name	Glass/Acrylic Aluminum Stage
Size	1.22*1.22m 4*4feet , 1.22*2.44m 4*8feet, 2*1m, 1*1m
Height	0.4-0.6m, 0.6-1m, 0.8-1.2m, 1-1.5m, or other height or fixed height
Legs	Round/square optional
Platform(material)	glass/Acrylic / plywood
Loading capacity	750kgs/m ²
Certification	CE
Board thickness	18mm
Feature	strong, easy to assemble and dismantle. Adjustable height
Application	for dancing on following occasions: school stage, event stage, performance stage, celebration stage, concert stage, wedding stage

The Benefits of the Stage System

- 1.Strong, safe and lightweight
- 2.The modular size (or sizes) can be customised to your specification
- 3.The height can be dictated by you
- 4.It can be tiered
- 5.It is easy and fast to assemble
- 6.The mobile stage storage unit takes up minimal space
- 7.The stage can be permanent or temporary
- 8.The configuration can be customised
- 9.Range of surface finishes available
- 10.Choice of black and metallic finished joints

11.Hand rail optional

Key principles:

Aluminum Framework: The stage is constructed using a framework made of aluminum. Aluminum is chosen for its lightweight yet strong properties, making it ideal for supporting the weight of the stage platform and any performers or equipment.

Modular Design: The aluminum framework is typically designed in a modular fashion, allowing for easy assembly, disassembly, and transportation. Modular components are connected using specialized connectors or fasteners, enabling customization of the stage size and configuration to suit different event requirements.

Glass or Acrylic Panels: The stage surface is comprised of glass or acrylic panels. These panels provide a transparent or translucent surface that adds a modern and elegant aesthetic to the stage. Glass panels are durable and offer excellent clarity, while acrylic panels are lightweight and shatter-resistant.

Support Structure: The aluminum framework provides the support structure for the glass or acrylic panels. The panels are securely attached to the framework using specialized clamps, brackets, or channels, ensuring stability and safety during use.

Safety Features: Safety is a paramount consideration in the design of Glass/Acrylic Aluminum Stages. The stage is engineered to meet safety standards and regulations, with features such as non-slip surfaces, guardrails, and load-bearing capacity considerations to prevent accidents and ensure the well-being of performers and audience members.

Customization Options: Glass/Acrylic Aluminum Stages offer various customization options to suit different event themes and requirements. This includes options for different panel sizes, shapes, and finishes, as well as the ability to integrate lighting, graphics, and branding elements into the stage design.

Durability and Maintenance: The materials used in Glass/Acrylic Aluminum Stages are chosen for their durability and ease of maintenance. Aluminum is resistant to corrosion and rust, while glass and acrylic panels are easy to clean and maintain, ensuring the longevity of the stage platform.

FAQ :

1. Q: What certificate do your factory have?

A: CE SGS certifications and some patent certifications for some new products.

2. Q: What is the terms of payment?

A: We accept Bank Transfer, Western Union or Escrow ,
