Eave Connection	Hot-dip Galvanized twin steel plate
Wind Loading	100km/hour

#### Here are some common materials typically used in the construction of such tents:

**Frame:** The frame of the tent is usually made of high-strength aluminum alloy or steel. These materials provide durability and stability to support the structure of the tent.

**Fabric:** The fabric used for the canopy and walls of the tent is often a high-quality PVC-coated polyester or vinyl material. This fabric is waterproof, UV-resistant, and durable, providing protection from rain, wind, and sunlight.

**Flooring:** The flooring of the double-decker tent may consist of heavy-duty materials such as plywood, aluminum, or composite decking. The choice of flooring material depends on factors such as load-bearing capacity, durability, and aesthetics.

**Insulation:** In some cases, insulation materials may be added to the walls and roof of the tent to regulate temperature and provide additional comfort, especially in extreme weather conditions.

**Accessories:** Other materials used in the construction of the tent may include zippers, fasteners, ropes, and connectors made of durable materials such as stainless steel or high-strength plastics.

#### FQA:

##### Q: Can you print our logos on the tent?

Yes. Customized logos can be printed on the tent fabric according to your requirements.

##### Q: Is that factory price?

Yes. We assure you all prices are based on factory.

##### Q: Does your tent be able to installed repeatedly? What is the life span?

Our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

##### Q: What documents are available?

A full range documents including structural drawings, packing list, installation manual and relative certificates can be provided. Moreover, customs declaration is provided. We provide one-stop service for you.
