#### Key principles:

**Versatility:** Wedding tents are available in various sizes, shapes, and styles to accommodate different wedding venues, themes, and guest counts. They can be customized to fit outdoor and indoor spaces, ranging from expansive open fields to compact backyard settings.

**Weather Protection:** One of the primary functions of wedding tents is to provide shelter and protection from the elements, including sun, rain, wind, and even cold temperatures. They are typically made from durable and weather-resistant materials such as polyester, vinyl, or canvas, and may feature sidewalls, roofs, and flooring options to enhance weatherproofing.

**Customization:** Wedding tents can be customized to match the couple's preferences, wedding theme, and decor style. They often feature customizable options such as sidewall designs, color schemes, lighting arrangements, flooring types, and interior decorations to create a personalized and visually appealing ambiance.

**Structural Stability:** Wedding tents are engineered with sturdy frame structures or tensioned fabric systems to ensure stability and safety, especially in outdoor settings where wind and other environmental factors may pose challenges. They are anchored securely to the ground using stakes, weights, or anchoring systems to prevent movement or collapse.

**Comfort:** Wedding tents are designed to provide a comfortable and inviting environment for wedding guests. They may include features such as climate control systems (heating, air conditioning), ventilation options, lighting solutions (chandeliers, string lights), and amenities like flooring, furniture, and restroom facilities to enhance guest comfort and convenience.

**Ease of Installation:** Wedding tents are designed for ease of installation and setup, allowing for efficient assembly and disassembly processes. They may utilize modular or portable construction methods that enable quick deployment and removal, making them suitable for temporary use at wedding venues.

**Regulatory Compliance:** Wedding tents are manufactured and installed in compliance with relevant safety regulations, building codes, and permitting requirements. This ensures that they meet standards for structural integrity, fire safety, occupancy capacity, and accessibility, providing a safe environment for wedding celebrations.

#### FQA:

**1)Q: Are you a factory or trading company?**

A: We are a professional tent factory. So we can offer you a competitive price and a fast delivery time, can also control the quality well and supply constantly to ensure the quantity.

**2)Q: What is the life span of your tents?**

A: Life span of the aluminium is 15-20 years, PVC fabric is 5-6 years. Good discount will be given you to get a new fabric from us after 5-6 years.

**3)Q: How to assemble your tents?**

A: We will provide the manual and video for you to study. If you need, we can send a technician to help you in your country.

**4)Q: How to choose the size of the tent?**

A: The size depends on how many people you want to stand, sit or have dinner in this tent. And the size also depends on the land space you will put up this tent. Normally, we advise 1-1.5sq.m/person.

**5)Q: What is the warranty and safety of your tents?**

A: Our tent is made by European standards and we own the CE/SGS quality management system certificate. Besides, we can design your tents with the emergency door and exit & panic lights to make sure the safety when have an emergency situation.
