Item	Span (Width m)	Bayspacing(m)	Eave height(m)	Ridge height (m)	Main frameprofile(mm)
XDP-6	6	3	2.5	3.5	48x84x3
XDP-8	8	3	2.5	3.9	48x84x3
XDP-10	10	3	2.5	4.3	48x84x3/48x100x3
XDP-12	12	5	3	5.1	68x122x3
XDP-15	15	5	3	5.4	108x150x3
XDP-18	18	5	4	6.9	112x203x4
XDP-20	20	5	4	7.2	112x203x4
XDP-25	25	5	4	8	113x259x5
XDP-30	30	5	4	8.8	120x300x5
XDP-40	40	5	4	10.4	120x300x5
XDP-50	50	5	5	13	128x350x5

Aluminum profile	high pressed extruded aluminum alloy 6061-T6 stainless,lightweight,durable,48x48x3mm for 3-10m tent 68x122x3mm,88x166x3mm,108x150x3mm,102x20x4mm for 10-20m tent 113x259x4mm,120x300x5mm for 20-40m tent 120x350x6mm for 40-50m tent
Steel parts	hot-dipped galvanized steel
Top roof fabric	850g/sqm double coated pvc, block-out,waterproof,frame retardant meet M2,B1,DIN4012 standard
Side panels(optional)	(1)650g/sqm double coated pvc,translucent,waterproof,flame retardant meet M2,B1,DIN4012standard,or; (2)950g/sqm transparent pvc fabric,or; (3)soild walls:glass panel,sanwich panels,ABSpanels,color steel sheet
Allowed temperature	-20o to 70o environment
Max wind loading capacity	100km/hour
Snow loading	25kg/sqm

Material options:

Polyester Fabric: Polyester fabric is a popular choice for tent canopies due to its durability, weather resistance, and ease of maintenance. It can be coated or treated to enhance water resistance and UV protection.

Vinyl/PVC Fabric: Vinyl or PVC-coated fabric is another common choice for tent canopies, offering excellent weather resistance, waterproofing, and durability. It's often used for larger tents or in areas with more extreme weather conditions.

Canvas Fabric: Canvas fabric provides a more traditional and elegant look and is often chosen for upscale events. It offers good breathability and a natural aesthetic but may require more maintenance and care compared to synthetic materials.

Clear PVC: For sidewalls or portions of the canopy, clear PVC panels may be used to allow natural light into the tent and provide a view of the surroundings. Clear PVC panels are often used for wedding tents to create a bright and airy atmosphere.

Aluminum Frame: While not a fabric material, the frame of the tent is typically made of aluminum or steel for durability and stability. Aluminum frames are lightweight, corrosion-resistant, and easy to assemble and disassemble, making them ideal for temporary structures like event tents.

Additional Options: Depending on the specific requirements of the event, additional materials such as flooring, carpeting, liners, drapery, and decorative elements may also be included to enhance the tent's appearance and functionality.

FQA:

1.What size tent do I need for my wedding?

This question addresses the appropriate tent size based on the number of guests, seating arrangements, and additional space requirements for dance floors, catering, and other activities.

2.How do I secure the tent?

This question provides information on securing the tent using anchoring methods such as stakes, weights, or ballasts, depending on the type of surface (grass, concrete, etc.).

3.Can the tent be installed on uneven ground?

This addresses whether the tent can accommodate uneven terrain and if leveling measures are available to ensure stability and safety.

4.What are the customization options for the tent?

This covers options for customizing the tent's appearance, such as choosing sidewall styles, roof designs, lighting options, flooring choices, and decorative elements.

5.Is heating or cooling available for the tent?

This addresses climate control options such as heaters or air conditioners to ensure guest comfort in various weather conditions.

6.Can I install flooring inside the tent?

This provides information on flooring options such as carpeting, wooden platforms, or modular flooring systems that can be installed inside the tent.

7.How far in advance should I book the tent for my wedding?

This advises on the recommended timeline for booking the tent to ensure availability and allow sufficient time for planning and customization.
