**Advantages:**

**Quality Material:** the lighting truss is made of quality aluminum, with a sturdy structure, not easy to bend, corrosion resistant, and has good durability, especially for long term indoor and outdoor use, and is an essential addition to your stage setup

**Suitable Truss Sizes for Versatile Uses:** the square cross section dimension of the spigot truss is about 12 x 12 inches/ 290 x 290 mm, a total length of about 4.92 ft/ 1.5 m; The suitable dimensions provide a wide range of applications, from small shows to large theater productions

**Excellent Load Capacity:** the load capacity of a single DJ truss can reach up to 500 pounds and weighs 18.4 pounds; Thanks to the sturdy raw materials and the multi section reinforced design of the DJ aluminum trusses, even heavy-duty lamps and lighting fixtures can be hung safely

**Convenient Lighting Truss System:** the kit includes 2 lighting trusses and 8 connection couplers for quick and easy installation; The stage truss allows lighting designers the freedom to hang LED or Automated fixtures where ever they choose, increasing the versatility and adaptability of the stage setting

**Classic Silver Finish:** the square truss comes in a silver finish, ideal for a wide range of stage decors; This minimalist color blends with most stage gear, ensuring your stage setup looks coordinated, while also reflecting professionalism and elegance; Our box trusses are not only functions well but also enhance the overall visual appeal of the performance area.

**FQA:**

**Q1. What is the MOQ ?**

200 sqm.
