Aluminum Spigot Truss.

Aluminum alloy truss, also known as truss, is generally made of aluminum alloy 6061-T6 modified by cutting, processing, polishing, painting, etc. It is widely used in performance exhibitions, events and celebrations, background decoration, sightseeing audio suspension, and other systems. The truss system can be constructed according to different sizes of the site, and can also be flexibly combined according to specific requirements. Lightweight, easy to construct and transport, with a maximum span of over 30 meters. Aluminum material is compressive, corrosion-resistant, and durable.
