10m	2.5m	4.3m	48*84	3m
12m	3m	5m	68*122	5m
15m	3m	5.4m	108*150	5m
18m	3m	5.9m	112*203	5m
20m	4m	7.2m	112*203	5m
25m	4m	8m	112*203	5m
30m	4m	8.8m	113*259	5m
40m	4m	10.5m	120*300	5m

Here's an overview of the typical process:

Initial Consultation and Requirements Gathering:

The process usually begins with a consultation between the tent manufacturer or supplier and the client. During this stage, the client discusses their requirements, including the purpose of the tent, size, capacity, features, and any specific customization needs.

Design and Planning:

Based on the client's requirements, the design team creates a detailed plan for the event sports marquee tent. This includes determining the tent size, layout, structural requirements, materials, color options, branding opportunities, and any additional features such as flooring, lighting, HVAC systems, and branding elements.

Engineering and Fabrication:

Once the design is finalized and approved by the client, the engineering team begins the structural analysis and calculations to ensure the tent meets safety standards and can withstand the required loads, including wind, snow, and other environmental factors. Meanwhile, the fabrication team starts manufacturing the tent components, including the frame, fabric panels, connectors, and accessories.

Quality Control and Testing:

Throughout the fabrication process, strict quality control measures are implemented to ensure that each component meets the required specifications and standards. Additionally, the assembled tent structure may undergo testing in controlled conditions to verify its strength, stability, and durability.

Logistics and Transportation:

Once all components are fabricated and quality-checked, they are packaged and prepared for transportation to the event site. Logistics planning is crucial to ensure that all components arrive on schedule and in good condition.

Installation and Setup:

Upon arrival at the event site, the tent installation team begins the setup process according to the pre-defined plan. This involves assembling the tent frame, installing fabric panels, securing the structure, and completing any additional features or customization as required. The installation process may vary depending on the tent size, complexity, and site conditions.

Final Touches and Branding:

Once the tent structure is installed, final touches such as flooring, lighting, HVAC systems, and branding elements are added to enhance the overall appearance and functionality of the event space. Branding elements such as logos, banners, and signage may be strategically placed to promote sponsors or event branding.

Handover and Client Satisfaction:

After the installation is complete, the client is given a walkthrough of the tent to ensure that all requirements have been met and that they are satisfied with the final product. Any last-minute adjustments or additions are addressed, and the client takes possession of the event sports marquee tent for the duration of the event.

Dismantling and Removal:

Once the event is over, the tent is dismantled, and all components are carefully packed for transportation back to the manufacturer or storage facility. Proper dismantling procedures are followed to ensure that the tent components are not damaged and can be reused for future events.

Maintenance and Storage:

After the event, the tent components may undergo maintenance, cleaning, and inspection to ensure they are in good condition for future use. Depending on the client's requirements, the tent may be stored at a designated facility or returned to the manufacturer for storage until the next event.

FQA:**Q: Are you tent factory?**

A: Yes, we are professional tent manufacturer in Guangdong of China .We assure you our prices are based on factory.

Q: What is the MOQ of the tent?

A: One Set.

Q: What size tent and what types do i need?

A: Tent size depends on the number of people to accommodate or the area you want to cover. In our factory, your choice can be 3 meter to 50 meter on width. For tent types, contact us with detailed requirements. We will send you our professional solution.

Q: What is the production time for standard tent?
