Characteristics	1.Durable,Light Weight with high loading capacity.
	2.Raw material is precipitation hardening aluminum alloy;
	3.Easy to assemble and dismantle;
	4.It can be made into different stage size according to your different location and occasion;
	5.Waterproof sunproof and anti-slip

#### Details:

##### Types of Truss:

There are several types of stage aluminum truss systems, including:

**Box Truss:** Features square or rectangular cross-sections and is commonly used for general-purpose applications.

**Triangle Truss:** Features triangular cross-sections and offers enhanced strength-to-weight ratio, making it suitable for heavier loads and longer spans.

**Circular Truss:** Features circular cross-sections and is often used for decorative or aesthetic purposes, such as creating curved or circular structures.

#### Applications:

Stage aluminum truss is used in a wide range of applications, including:

Concerts and Music Festivals  
Theatrical Productions  
Trade Shows and Exhibitions  
Corporate Events and Conferences  
Sporting Events  
Nightclubs and Bars  
Houses of Worship  
TV and Film Productions
