Features:

Unique Design: The spherical shape of these tents provides a striking visual impact, making them stand out in any environment. The geodesic dome design offers structural stability and strength, allowing for large, open interiors without the need for internal support columns.

Spacious Interiors: Despite their compact footprint, Commercial Spherical Dome Tents offer spacious and versatile interiors, making them suitable for a variety of uses, including exhibitions, trade shows, product launches, conferences, and weddings.

Customization Options: These tents can be customized to suit specific requirements and preferences, including size, color, branding, and interior layout. Customization options may also include flooring, lighting, heating, and air conditioning systems.

Weather Resistance: Commercial Spherical Dome Tents are designed to withstand various weather conditions, including wind, rain, and snow. The durable materials and construction ensure longevity and reliability in outdoor environments.

Quick Installation: These tents can be quickly and easily assembled and disassembled, making them ideal for temporary or semi-permanent installations. Some models feature modular components that allow for easy transportation and setup.

Branding Opportunities: The unique shape and customizable features of Commercial Spherical Dome Tents offer excellent branding opportunities for businesses and sponsors. Logos, graphics, and messaging can be prominently displayed on the exterior and interior surfaces of the tent.

Versatility: Commercial Spherical Dome Tents are suitable for a wide range of commercial and recreational applications, including events, exhibitions, hospitality suites, pop-up shops, restaurants, and more.

FQA:

1. Can you print our logos on tent ?

Yes. Customized logos can be printed on the tent fabric according to your requirements.

2. Is that factory price?

Yes. We assure you all prices are factory price.

3. Is your tent strong and stable enough ? How about the wind loading ?

Yes, it can resist wind up to 100 km/hr, if the wind or snow is very very heavy, please tell us and we will strengthen the tent to keep you safe!

4. Has your tent product been certified?

Yes. Our tent product has passed the engineering tests and gained the America And Australia structural engineering certificates. Besides, the PVC fabric used for roof covers.
