Wind load: max. 100km/h

Snow load: 75kg/sqm

Easy to assemble and 100% available interior space.

Features:

Weather Resistance: Wedding event tents are constructed using durable materials that are waterproof, UV-resistant, and flame-retardant, ensuring protection against rain, sun, wind, and other weather conditions. This allows couples to plan their outdoor wedding with confidence, knowing that their guests will be comfortable regardless of the forecast.

Customization Options: These tents can be customized to suit the couple's preferences and wedding theme. From elegant drapery and lighting to personalized decor and furnishings, wedding event tents offer endless possibilities for creating a dream wedding setting.

Spacious Interior: Wedding event tents come in various sizes and configurations to accommodate different wedding sizes and layouts. They offer a spacious interior with high ceilings, providing ample room for seating, dining, dancing, and other wedding activities.

Ease of Assembly: Wedding event tents are designed for quick and easy setup, typically requiring minimal tools and expertise. The frame structure is usually made of lightweight yet sturdy materials such as aluminum or steel poles, while the canopy or covering can be attached securely to the frame.

Accessibility: Wedding event tents can be equipped with features such as ramps, doorways, and wheelchair-accessible facilities to ensure inclusivity and convenience for all guests.

FAQ :

Q: Are you manufactory or trade Company?

A: We are the OEM manufactory specialized in tent more than 15 years.

Q: What's the right size of tent do I need?

A: Generally speaking, if you just use chair inside the tent you need 0.8 to 1.2 sqm space for each person, if you use tables and chairs together, you need 1.3 to 1.5 sqm space for each person, if you use no tables and chairs together at all, you just need 0.6 sqm space for each person.

Q: Is your tent strong and stable enough? How about the wind loading?

A: Yes, the main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6) so our tent structure is safe and strong and can resist wind up to 100 km/hr.
