Factory Supply Outdoor Aluminum Structure Storage Tent PVC Fabric Large Tent for sale

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Features: Water Proof, UV Resistance, Fire Retardant(DIN4102,B1,M2)
- Product Name: Aluminum Structure Storage Tent
- Aluminum Alloy: Aluminum Alloy
- Surface Treat Method: Surface Oxidation
- Tent Roof Fabric: 850g/sqm, 750g/sqm, 650g/sqm
- Warranty: 1 Years
- Application: Warehouse, Party, Event, Ceremony Hall And So On
- Fabric Color Option: White, Blue, Yellow, Red, Transparent Or Customized

Product Description

Factory Supply Outdoor Aluminum Structure Storage Tent PVC Fabric Large Tent For Sale

Description :

Main Frame	Clear-span Width: From 3m to 70m, length is no limit
Structure	Material: Hard Pressed Extruded Aluminum Alloy 6061-T6& 6082-T6
Cover material	Density: 650g/sqm, 750g/sqm, 850g/sqm
	Material: Both sides lacquered PVC coated fabric Features: UV Resistant, Waterproof, Fire Retardant B1,Mildew,Self-cleaning ability.
Sidewall	PVC Wall, Glass Wall, ABS Wall, Sandwich Wall
Wind Load	80km/h - 100km/h
Snow Load	10cm Thickness Floating Snow
Temperature Index	-30 Degree Celsius to +70 Degree Celsius
Life Time	Aluminum frame more than 15 Years. PVC fabric 5-10 years
Certification	ISO9001, SGS,Coc, CE

Material:

Aluminum Alloy Frame:

The frame of an Aluminum Structure Storage Tent is primarily constructed from aluminum alloy. Aluminum is chosen for its lightweight yet sturdy properties, making it an ideal material for supporting the structure of the tent.

Aluminum alloy is corrosion-resistant, ensuring the durability and longevity of the tent frame even when exposed to outdoor elements such as rain, snow, and sunlight.

The aluminum frame is typically comprised of hollow or solid aluminum tubes or profiles, which are connected using various joining methods such as bolts, screws, or welding, depending on the design and manufacturer specifications.

PVC or PE Fabric Cover:

The cover of an Aluminum Structure Storage Tent is made from PVC (Polyvinyl Chloride) or PE (Polyethylene) fabric. Both materials offer excellent waterproofing and weather resistance, protecting the contents of the tent from moisture, rain, and UV radiation.

PVC fabric is known for its durability, flexibility, and flame-retardant properties. It is commonly used for industrial and commercial applications, including storage tents, due to its high tensile strength and resistance to tearing and abrasion.

PE fabric, on the other hand, is lightweight and cost-effective while still providing adequate protection against the elements. It is often used for temporary or semi-permanent structures where portability and affordability are key considerations.

The fabric cover is typically attached to the aluminum frame using tensioning systems such as ratchets, straps, or bungee cords to ensure a secure and tight fit.

FQA:

Q1. You are manufacture factory or trading company?

We are manufacture factory. And you are welcomed to visit us at any time. The quality control flow and sales team will show you our professionalism. Also you will can get best and most competitive price after visiting us.

Q2. Is your price competitive compared with other companies?

Our business objectives are to give the best price with same quality and best quality with the same price. We will do everything we can to reduce your cost and guarantee you get the best product that you paid for.

Q3: Can you print our logos on event tent for sale?

Yes.Customized logos can be printed on the tent fabric.

Q4: Is your tent strong and stable enough?How about the wind loading?

Yes.The main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6),so our tent structure is safe and strong enough to resist wind up to 100 km/hr.

Q5. Do you accept container loading inspection?

You are welcomed to send an inspector, not only for the container loading, but any time during the production time.

Q6.Does your tent be able to installed repeatedly?

What is the life span? Sure, our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

Q7: How long is the warranty period?

Guarantee is one year. During the warranty period, we shall repair or replace the damaged part accordingly because of any damage due to quality problem.
