40m	4.8m	11.2m	5m	340x170x6mm
50m	4.8m	13.9m	5m	340x170x6mm

Key features:

Durable Construction: PE PVC warehouse tents are constructed with a sturdy frame typically made of galvanized steel or aluminum, providing structural stability and strength. The frame is designed to withstand various weather conditions and loads, ensuring the safety and integrity of the tent structure.

Weather Resistance: The PVC (Polyvinyl Chloride) or PE (Polyethylene) fabric used for the cover of warehouse tents offers excellent weather resistance, including protection against UV radiation, rain, wind, and snow. The fabric is typically treated with coatings or laminates to enhance durability and waterproofing, ensuring that stored goods remain dry and protected from the elements.

Customizable Size and Configuration: PE PVC warehouse tents come in a variety of sizes and configurations to suit different storage requirements. They can be customized to accommodate specific dimensions, allowing for flexible storage capacity and layout options. Additionally, modular designs allow for easy expansion or modification of the tent structure as needed.

Quick Assembly and Disassembly: Warehouse tents are designed for rapid installation and dismantling, minimizing downtime and labor costs. The modular construction and pre-fabricated components allow for easy assembly using basic tools and equipment. This feature is particularly advantageous for temporary storage needs or situations where mobility is required.

Versatility: PE PVC warehouse tents are versatile structures that can be used for a wide range of storage applications, including warehousing, logistics, inventory management, manufacturing, construction, agriculture, and more. They provide a cost-effective and flexible solution for businesses and organizations seeking additional storage space without the need for permanent infrastructure.

FQA:

1. Can we put our logo on it?

Of course, we can do it according to your requirement.

2. what's the delivery time?

30days after getting 30% deposit for one 40HC container loading quantity

3. is sample available?

Yes, but the price is two times than bulk quantity unit price

5. can we visit your factory to test quality before delivery?

Of course, we welcome and sincerely invite you to visit us at your any convenient time
