

Free Design waterproof Aluminum Alloy Farm Building Structure Tent For Sale

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

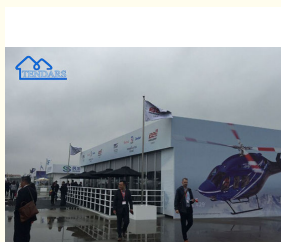

Product Specification

- Product Name: Aluminum Alloy Farm Tent For Sale
- Place Of Origin: Guangdong, China
- Structure Type: Light Portal Frame Structure
- Application: Steel Structure Warehouse
- Color: Blue Red White Green Etc
- Surface Treatment: Hot Dip Galvanised
- Application Fields: Steel Structural Fabrication Const
- Processing Service: Welding, Cutting

Product Description

Free Design Waterproof Aluminum Alloy Farm Building Structure Tent For Sale

Description :

thickness	0.2-3mm.
Wind resistance	≤28.4m/s
Seismic resistance	8 Grade
Lifespan	20-30 Years
Roof and wall	Aluminum Alloy
door	Steel door
Window	Plastic-steel

Here are the principles behind their design and application:

Aluminum Alloy Framework: The primary principle revolves around utilizing lightweight yet sturdy aluminum alloy frames. Aluminum alloys are chosen for their corrosion resistance, durability, and strength, making them suitable for withstanding outdoor conditions commonly found in agricultural environments.

Modular Design: Farm tents typically feature a modular design, allowing for easy assembly, disassembly, and reconfiguration as needed. This modular approach enables farmers to customize the size and layout of the tent to suit specific requirements, whether it's for crop protection, animal housing, or storage purposes.

Covering Material: The covering material of farm tents can vary depending on the intended use. Common options include durable fabrics such as polyethylene (PE) or polyvinyl chloride (PVC) tarpaulins, which offer weather resistance and UV protection. Some tents may also feature translucent or opaque coverings to control light transmission and create optimal growing conditions for crops or provide suitable shelter for livestock.

Ventilation and Climate Control: Proper ventilation is essential for maintaining optimal conditions inside farm tents, especially when used for housing livestock or growing plants. Ventilation systems, such as roll-up sidewalls, ridge vents, or adjustable openings, help regulate temperature, humidity, and air quality within the tent, promoting healthy growth and ensuring the comfort of animals.

Versatility and Adaptability: Aluminum alloy farm tents are designed to be versatile and adaptable to various agricultural applications. They can be used as temporary or semi-permanent structures for seasonal crops, animal husbandry, machinery storage, or as workspaces for farm operations. Their versatility allows farmers to maximize land use efficiency and adapt to changing needs throughout the agricultural cycle.

Protection and Security: Farm tents provide protection against adverse weather conditions, pests, and other environmental factors that can impact agricultural productivity. They offer a controlled environment where crops can be grown year-round, regardless of external conditions. Additionally, farm tents can enhance security by safeguarding valuable equipment, machinery, or livestock from theft or vandalism.

Cost-Effectiveness: Compared to traditional permanent structures, aluminum alloy farm tents offer a cost-effective solution for expanding operational capacity on the farm. They require less upfront investment and can be installed quickly without the need for extensive site preparation or construction permits. Furthermore, their portability allows farmers to relocate or repurpose the tents as needed, maximizing their return on investment.

FAQ:

1. You are manufacture factory or trading company?

We are a factory. You are welcomed to visit us at any time.

The quality control flow and sales team will show you our professionalism. Also you will can get best and most competitive price after visiting us.

2. Is your price competitive compared with other companies?

Our business objectives are to give the best price with same quality and best quality with the same price. We will do everything we can to reduce your cost and guarantee you get the best product that you paid for.

3. Can you send engineers or whole team to install my project?

We will give detailed installation drawings for free. We can send engineers as installation director or a team upon request.

4. Do you accept container loading inspection?

You are welcomed to send an inspector, not only for the container loading, but any time during the production time.

5. What is the lead time?

Lead time depends on order quantities. In general the delivery time to nearest seaport in China will be 40 days after receiving

deposit.

6. How can you get a quotation for your projects?

You can contact us by email, phone, WhatsApp, Skype, Viber and so on 24*7 and you will get reply within 8 hours.
