payment	30% TT deposit, 70% TT balance
suit to	Distributor, wholeseller, rental company, contractors ect
Delivery time	25 working days after receipt of deposit
Shipment	Normally send wedding stretch tents by sea

#### How to install a big marquee tent:

##### Select a Suitable Location:

Choose a flat and level area large enough to accommodate the size of the tent. Ensure the ground is free from any debris, rocks, or obstacles that could damage the tent or its components.

##### Lay Out the Tent Components:

Unpack the tent components and lay them out near the installation site. Organize the frame pieces, canopy fabric, sidewalls (if applicable), stakes, and guy ropes according to the assembly instructions provided by the manufacturer.

##### Assemble the Frame:

Start by assembling the frame according to the manufacturer's instructions. Connect the frame pieces together, ensuring that all connections are secure and tight.

Depending on the design of the tent, you may need to erect center poles, spreader bars, or arches to support the frame structure.

##### Raise the Frame:

With the help of assistants, lift the assembled frame into an upright position. Carefully maneuver the frame into place, ensuring it is centered and aligned correctly over the marked tent footprint.

**Secure the Frame:**

Anchor the frame to the ground using stakes or weights. Hammer the stakes into the ground at an angle, ensuring they are firmly secured. Alternatively, if the tent is being installed on a hard surface such as concrete or asphalt, use weights, sandbags, or water barrels to anchor the frame instead of stakes.

**Install the Canopy Fabric:**

Drape the canopy fabric over the assembled frame, ensuring that it is evenly distributed and properly aligned. Start at one end and work your way to the other, smoothing out any wrinkles or creases as you go. Secure the canopy fabric to the frame using the provided fasteners or clips. Make sure the fabric is taut and stretched evenly across the frame.

**Attach Sidewalls and Accessories:**

If the tent includes sidewalls, install them by attaching them to the frame using hook-and-loop fasteners, zippers, or clips. Install any additional accessories such as doors, windows, or ventilation panels according to the manufacturer's instructions.

**Stabilize the Tent:**

Check the tension of the canopy fabric and adjust as needed to ensure a snug fit. Use guy ropes to further stabilize the tent, especially in windy conditions. Secure the guy ropes to the tent frame and anchor them to the ground with stakes or weights.

**Inspect and Test:**

Inspect the tent for any signs of damage, loose connections, or other issues. Test the stability and integrity of the tent by gently shaking or pushing on the frame to ensure it is secure.

**Final Touches:**

Make any final adjustments or modifications as needed to ensure the tent is properly installed and ready for use. Add any finishing touches such as decorations, lighting, or signage to personalize the tent for the event.

**FAQ:**

**Q1. You are manufacture factory or trading company?**

We are manufacture factory. And you are welcomed to visit us at any time. The quality control flow and sales team will show you our professionalism. Also you will can get best and most competitive price after visiting us.

**Q2. Is your price competitive compared with other companies?**

Our business objectives are to give the best price with same quality and best quality with the same price. We will do everything we can to reduce your cost and guarantee you get the best product that you paid for.

**Q3: Can you print our logos on event tent for sale?**

Yes. Customized logos can be printed on the tent fabric.

**Q4: Is your tent strong and stable enough?How about the wind loading?**

Yes. The main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6), so our tent structure is safe and strong enough to resist wind up to 100 km/hr.

**Q5. Do you accept container loading inspection?**

You are welcomed to send an inspector, not only for the container loading, but any time during the production time.

**Q6. Does your tent be able to installed repeatedly?**

What is the life span? Sure, our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

**Q7: How long is the warranty period?**

Guarantee is one year. During the warranty period, we shall repair or replace the damaged part accordingly because of any damage due to quality problem.

**Q8: How is the quality of the product guaranteed?**

Our products will be strictly tested by the quality inspection department before leaving the factory, and each product will be strictly controlled to ensure product quality.
