40m	5m	4m	10.3m	300*125*6mm
50m	5m	4m	12m	300*125*6mm

Here are some key features of refugee disaster relief tents:

Quick Assembly: Refugee disaster relief tents are designed for rapid deployment and easy setup, allowing humanitarian organizations to provide immediate shelter to displaced populations in emergency situations. The tents typically come with simple assembly instructions and require minimal tools and expertise to erect.

Portability: These tents are lightweight and compact, making them easy to transport to remote or hard-to-reach areas affected by disasters or conflicts. They can be packed into compact bundles for efficient transportation via trucks, airplanes, or helicopters, ensuring timely delivery to those in need.

Durable Construction: Refugee disaster relief tents are constructed from durable materials that can withstand harsh weather conditions and provide reliable shelter for an extended period. Common materials include high-quality polyester or polyethylene fabrics that are waterproof, UV-resistant, and flame-retardant.

Weather Resistance: The tents are designed to offer protection against various weather elements, including rain, wind, sun exposure, and extreme temperatures. Reinforced seams, waterproof coatings, and sturdy frames help ensure that occupants remain safe and comfortable inside the tent, regardless of external conditions.

Modular Design: Many refugee disaster relief tents feature a modular design that allows them to be interconnected or arranged in clusters to create larger shelter complexes. This modularity enables humanitarian organizations to adapt the shelter layout to meet the specific needs and preferences of displaced populations.

Ventilation and Airflow: To ensure adequate airflow and ventilation inside the tent, refugee disaster relief tents often include features such as mesh windows, vents, and adjustable openings. Proper ventilation helps regulate temperature and humidity levels, preventing condensation and improving indoor air quality.

FAQ:

Q:What's your MOQ?

A:Different products have different MOQ, Normally the MOQ for Custom Products are large but if your quantity can't reach it, we can find our stocklot fabric to make a small order for you

Q:What's your delivery time?

A:3-7days for sample, 25-30days for mass production

Q:What's your payment terms?

A:For order: 30%T/T deposit at order in advance.70%T/T after receiving the copy of B/L. For sample less than USD1000 100% Western Union.

Q:How can I get my sample or order?How can I know you sent the good?
