# **Product Description**

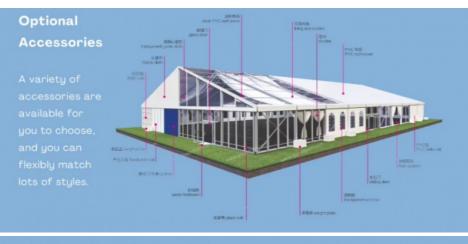

### Customized Size Aluminum Stretch Foldable Waterproof Marquee Tent For Outdoor Events

### Description :

Item	Spec			
Clear Span(With)	20m	25m	30m	40-50m
Side Height	4m	4m	4m	4m
Ridge Height	7.2m	8m	8.9m	10.5-12.1m
Longest Component	6m	6m	6m	6m
Bay Distance	5m			
Minimum Length	20m			
Maximum Length	No limited			
Max.allowed wind speed	80~100 km/h(USA standard :50~60 miles per hour)			
Eave Connection	Galvanized steel insert			
Frame Material	Hard Pressed Extruded Aluminum 6061/T6			
Cover Material	Double Coated Polyester Textile, 650-850 g/m Flame Retardant to DIN 4102 B1,M2			
Optional Accessories	PVC Windows, Glass door, Anchoring, Rain gutter, Hard walling system, Lining and Curtain, Flooring system, Glass walling system,Weight Plate, Hard walling system			

### Details:

## **Details determine quality**

### Key principles:

High-Quality Waterproof Materials: The primary principle behind waterproof marquee tents is the use of high-quality materials that are specifically designed to repel water. These materials often include waterproof fabrics such as PVC-coated polyester or polyethylene, which have a tight weave and a waterproof coating applied to the surface. These materials prevent water from penetrating the tent's canopy and dripping inside.

Seam Sealing: Another crucial principle is seam sealing. The seams where different panels of fabric are stitched together are potential weak points for water penetration. To prevent leaks, manufacturers use special waterproof tapes, adhesives, or heat-sealing techniques to seal these seams effectively. This ensures that water cannot seep through the stitched areas.

**Reinforced Edges and Corners**: Reinforced edges and corners are essential for waterproof marquee tents to withstand the stress of wind and rain. These areas are particularly vulnerable to wear and tear, so extra reinforcement with additional layers of fabric or durable materials helps prevent water ingress and prolongs the tent's lifespan.

Sloped Roof Design: Waterproof marquee tents typically feature a sloped roof design. This design allows rainwater to run off the canopy rather than pooling on top, which could lead to sagging or leaking. The angle of the roof ensures efficient drainage, directing water away from the tent and preventing accumulation.

Water-resistant Zippers and Fasteners: To maintain the tent's waterproof integrity, water-resistant zippers and fasteners are often used in critical areas such as door openings and windows. These zippers are designed with waterproof coatings or flaps to prevent water from seeping through the zipper teeth and entering the tent.

#### FAQ:

#### 1.How big a tent do i need ?

Tent size depends on the number of people/area you want to cover.Normally,we calculate1-1.5sqm per person.

#### 2.Our MOQ?

Different products ,different MOQ,pls call or email to learn.

#### 3.Can you make design for customer?

Yes,we have our own designer,we can make any customer design,different size and different colors.

#### 4.Can i put my logo onto the products?

Yes, you can choose the silk imprint or digital imprint.

#### 5.Any accessories included?

Our quotation includes repair kits, ground peg.

#### 6.Product time.

For 1 pc sample,the production time is about 10 days after payment receipt. For 20' container of order.the production time is about 30 days .

#### 7.What payment term:

T/T 30% deposit,70% before shipment arranged or after goods inspected.

L/C irrevocable and at sight. Western union or Paypal for small order.
