*****Snow Load:** 75kgs/sqm

*****Wind Resistance:** 100-120km/h

*****Temperature Resistance:** -30 to +70 Celsius

(Frame and fabric can both be reinforced depending on weather conditions of installation city.)

Frame	High Reinforce Aluminum, anti-rust surface, GB6061-T6 ;100%"FENGLV "Aluminum Material Guaranteed;
	It can be used more than 30 years
Roof cover	850g/m ² and 660g/m ² Double PVC-Coated Polyester, flame retardant, UV resistance, waterproof, comply to DIN 4102 B1, M2 (European
	standard); 100% XingYiDa PVC Material Guaranteed - Perfect Fabric Cover Brand in China Recently.
Sidewa ll	Allowed Temperature Condition: -40to +70 temperature
	Max Wind Speed Allowance: 120km/h
	Snow Load: 75kg/sqm
Connec tion	Hot-DIPPED Galvanized Steel Connections; 100% Zinc Shine Hot Dip Galvanizing Guaranteed

Here are some common applications:

Temporary Warehousing: Industrial marquees are frequently used as temporary warehouses for storing goods, equipment, and materials. These structures provide additional storage space during peak seasons, construction projects, or warehouse renovations. Their modular design allows for easy customization to accommodate specific storage requirements.

Manufacturing Facilities: Industrial marquees can be utilized as temporary manufacturing facilities to accommodate production processes or assembly lines. These structures offer a cost-effective solution for expanding manufacturing capacity without the need for permanent construction. They can be equipped with lighting, HVAC systems, and other utilities to create a comfortable working environment.

Logistics and Distribution Centers: Industrial marquees are often deployed as temporary logistics hubs or distribution centers for handling shipments, inventory management, and order fulfillment. They serve as versatile spaces for loading and unloading goods, sorting operations, and cross-docking activities. Their modular design allows for quick setup and reconfiguration to adapt to changing operational needs.

Construction Sites: Industrial marquees are commonly used on construction sites as temporary shelters for workers, equipment, and materials. They provide protection from the elements, such as rain, sun, and wind, allowing construction projects to proceed efficiently regardless of weather conditions. Industrial marquees can also serve as on-site offices, meeting rooms, or storage facilities for construction-related activities.

FAQ:

Q1. You are manufacture factory or trading company?

We are manufacture factory. And you are welcomed to visit us at any time. The quality control flow and sales team will show you our professionalism. Also you will can get best and most competitive price after visiting us.

Q2. Is your price competitive compared with other companies?

Our business objectives are to give the best price with same quality and best quality with the same price. We will do everything we can to reduce your cost and guarantee you get the best product that you paid for.

Q3: Can you print our logos on event tent for sale?

Yes. Customized logos can be printed on the tent fabric.

Q4: Is your tent strong and stable enough? How about the wind loading?

Yes. The main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6), so our tent structure is safe and strong enough to resist wind up to 100 km/hr.

Q5. Do you accept container loading inspection?

You are welcomed to send an inspector, not only for the container loading, but any time during the production time.

Q6. Does your tent be able to installed repeatedly?

What is the life span? Sure, our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.
