Here are some common materials used for outdoor party tents:

Polyethylene (PE): PE is a common material for budget-friendly tents. It's lightweight, waterproof, and UV-resistant. However, it may not be as durable as other materials and can degrade over time with prolonged exposure to sunlight.

Polyester: Polyester is another popular choice for tent material. It's durable, water-resistant, and offers good UV protection. It's often coated with a layer of polyurethane to enhance its waterproof properties.

Canvas: Canvas tents are known for their durability and breathability. They provide excellent protection against the elements and can withstand

harsh weather conditions. However, they are heavier and bulkier compared to other materials.

Vinyl: Vinyl tents are extremely durable and weather-resistant. They provide excellent protection against rain, wind, and UV rays. However, they tend to be heavier and more expensive than other materials.

Nylon: Nylon tents are lightweight, waterproof, and quick-drying. They are often used in backpacking and camping tents but can also be suitable for small outdoor parties. However, they may not offer as much durability as other materials.

PVC (Polyvinyl Chloride): PVC is a sturdy and waterproof material commonly used in commercial-grade tents. It provides excellent protection against the elements but may be heavier and more expensive than other materials.

Safe Packing are available

FAQ:

Q1. What is the Life Span?

The lifespan of the aluminum frame can reach 15-20 years, and 5-8 years for PVC fabrics depending on weather conditions of different countries.

Q2. Is it Easy to install and dismantle ?

Yes, it can be used as both permanent and temporary structures. Easy to install, dismantle and transport.

Q3. What is the requirement to the ground foundation?

Our tent structure can install on concrete ground, grassland, or sand ground in the desert. If install in grassland or sand ground, you will need to request anchor from our sales.

Q4. What is the payment term?

30% deposit to start production, balance after goods ready before shipping.

Q5. What is your production time?

We will finish production within 15 to 25 days after deposit.

Q6. Are you a direct factory?

Yes, we are a direct factory. Our factory is located in Guangzhou City, China.
