8m Width	2.6m	4.06m	84*48*3	Customizable
10m Width	2.6m	4.32m	84*48*3	Customizable
12m Width	3m	4.85m	122*68*3	Customizable
15m Width	3m	5.44m	166*88*3	Customizable

Details:

Here are some key characteristics of transparent PVC fabric used in the roof of event marquee tents:

Transparency: Transparent PVC fabric is designed to be completely see-through, allowing for maximum visibility both inside and outside the tent. This feature creates a bright and airy atmosphere inside the tent during the day and offers guests a clear view of the sky, trees, or other outdoor features.

Durability: Despite its transparency, transparent PVC fabric is durable and capable of withstanding various weather conditions. It is typically treated to be waterproof, UV-resistant, and flame-retardant, ensuring that it provides adequate protection for event attendees regardless of the weather.

Weather Resistance: Transparent PVC fabric is designed to provide protection against the elements, including rain, wind, and sunlight. It is

waterproof, preventing water from seeping through the roof and keeping guests dry during rainy weather. Additionally, the fabric is UV-resistant, helping to block harmful UV rays and reduce heat buildup inside the tent.

Lightweight: Transparent PVC fabric is lightweight and flexible, making it easy to transport, handle, and install. Despite its lightweight nature, it is strong and tear-resistant, ensuring that it can withstand the rigors of outdoor use.

Ease of Maintenance: Transparent PVC fabric is easy to clean and maintain, requiring only periodic washing with mild soap and water to remove dirt, dust, and other debris. Additionally, the fabric is resistant to mold and mildew, reducing the risk of staining or discoloration over time.

Customization Options: While transparent PVC fabric is primarily used for the roof of event marquee tents, it can also be used for sidewalls and other sections of the tent if desired. Additionally, the fabric can be customized with branding, logos, or decorative elements to suit the specific needs and preferences of the event.

FAQ:

1. who are we?

We are factory ,based in Guangdong, China.

2. how can we guarantee quality?

Always a pre-production sample before mass production;
