Be used on the ground which can be damaged, such as cement or tarmac ground.

Fixed Style 2. Steel Nails:

Be used on the ground which is the loose ground, such as the sand and grass

Fixed Style 3. Loading plates:

Be used on the ground which can not be damaged such as marble and tile ground

Here are the key principles behind large marquee event tents:

Space Maximization: Large marquee event tents are designed to maximize interior space while minimizing the footprint. Their open-span design eliminates the need for internal support poles or columns, providing unobstructed space for various activities such as seating, dining, entertainment, and exhibits.

Modularity: These tents typically feature a modular design, allowing for customization in terms of size, layout, and configuration. Multiple tent units can be connected or arranged to create larger spaces or accommodate specific event requirements, making them adaptable to different venues and occasions.

Quick Assembly and Disassembly: Large marquee event tents are engineered for easy and rapid setup, enabling efficient deployment and removal before and after events. Modular components and simple assembly mechanisms facilitate quick installation without the need for specialized tools or equipment, saving time and labor costs.

Durability and Stability: Large marquee event tents are constructed from high-quality materials such as aluminum alloy or steel frames and durable fabric covers. These materials provide structural stability, resistance to weather elements, and longevity, ensuring the tent remains reliable and secure during events.

Weather Protection: These tents offer shelter and protection from various weather conditions, including rain, wind, sun exposure, and temperature fluctuations. The weather-resistant fabric covers and reinforced seams help to keep occupants dry and comfortable inside the tent, regardless of outdoor conditions.

FAQ:

1. Can you print our logos on the tent?

Yes. The logo can be printed on the tent fabric according to your requirements.

2. What is the delivery time?

In general, about 7-15 working days. If your order is large or customized, the lead time needs more time.

3. Is your tent strong and stable enough? How about the wind loading?

Yes, it can resist wind up to 80-100 km/hr, if the wind or snow is very very heavy, please tell us and we will strengthen the tent to keep you safe!

4. Does your tent be able to be installed repeatedly? What is the life span?

Our tents can be assembled and dismantled easily and repeatedly with small transportation size. The life span of aluminum framework can reach 8-10 years, and 4-6 years for PVC fabrics depending on different conditions of usage.
