(2)950g/sqm transparent pvc fabric

(3)solid walls: glass panel, sandwich panels, ABS panels, color steel sheet

Here are the key principles involved in creating a waterproof tent for marriage:

High-Quality Waterproof Materials: The tent canopy and sidewalls are made from high-quality waterproof materials such as vinyl-coated polyester, PVC, or treated canvas. These materials are specifically designed to repel water and prevent leaks, keeping the interior of the tent dry during rain showers or inclement weather.

Sealed Seams: Seams are potential weak points where water can penetrate the tent fabric. To prevent leakage, the seams of the tent canopy and sidewalls are sealed using techniques such as heat sealing or seam sealing tape. This reinforces the seams and ensures that water cannot seep through the stitching.

Weatherproof Design: Waterproof tents for marriage are designed with features that enhance their ability to withstand adverse weather conditions. This includes sloped roofs to facilitate water runoff, flaps or overhangs at the edges of the canopy to divert water away from the tent, and secure anchoring systems to prevent displacement during windy conditions.

Tensioned Canopy: The canopy fabric is tensioned tightly over the tent frame to create a smooth surface that encourages water runoff. Proper tensioning prevents water from pooling or collecting on the surface of the tent, reducing the risk of leakage and ensuring that rainwater drains away efficiently.

Optional Accessories: Some waterproof tents for marriage may offer optional accessories to further enhance weather protection. This may include sidewalls with clear windows for natural light, gutters and downspouts to channel rainwater away from the tent, and flooring systems to create a barrier between the ground and the interior of the tent.

Professional Installation: Waterproof tents for marriage are typically installed and set up by experienced professionals. This ensures that the tent is erected securely and according to manufacturer specifications, minimizing the risk of water infiltration and ensuring the safety and comfort of wedding guests.

Advantages:

1. Flexible and convenient

Easy installation and disassembly, adapted to different sites.

2. Safety and Solid

Structural stability, resistance to wind and snow shock

3. Universally applicable

Army winter tent, festival celebration, catering, logistics, outdoor recreation, for the convenience of city, and so on, all kinds of outdoor activities temporarily
