40x60	6	120x300x5	2400	1500-1200 Peoples

Here are some key characteristics and features of large industrial tents for storage:

Size and Capacity: Large industrial tents are spacious structures that can range in size from hundreds to thousands of square meters. They offer ample storage capacity to accommodate a wide range of items, from small parts and tools to large equipment and vehicles.

Durable Construction: These tents are constructed using high-quality materials such as galvanized steel or aluminum frames and heavy-duty fabric covers made of PVC or polyethylene. The sturdy construction ensures structural integrity and durability, providing reliable protection for stored items in various weather conditions.

Weather Resistance: Large industrial tents are designed to withstand harsh weather conditions, including wind, rain, snow, and UV exposure. The fabric covers are treated for UV resistance, waterproofing, and flame retardancy to ensure that stored items remain safe and protected from the elements.

Quick Assembly and Portability: Despite their size, large industrial tents can be assembled relatively quickly using modular construction techniques and pre-fabricated components. This allows for rapid deployment and relocation as needed, providing flexibility for changing storage requirements or site conditions.

Customization Options: Industrial tents can be customized in terms of size, layout, and features to meet specific storage needs. Optional features such as doors, windows, ventilation systems, lighting, insulation, and security measures can be added to enhance functionality and convenience.

Accessibility and Functionality: Large industrial tents are designed with accessibility in mind, featuring wide doors, roll-up sidewalls, and clearspan interiors that allow for easy loading, unloading, and movement of goods and equipment. The layout and configuration of the tent can be customized to optimize storage space and workflow efficiency.

FQA:

1. Can you print our logos on tent?

Yes. Customized logos can be printed on the tent fabric according to your requirements.

2. What is the delivery time?

In general, about 7-15 working days. If your order is large or customized, the lead time needs more time.
