2.Materials We Are Using:

3.Tent fixation

1. The hard cement floor is fixed with expansion screws
2. Grass, mud and soft ground are fixed by steel brazing
3. If the ground is not good for destructive fixation, our company provides the counterweight plate for the feet and the load-bearing plate is charged. Each foot needs at least 500KG weight, and the counterweight (such as yellow sand, sandbags) is provided by the customer
4. Before the implementation of the project, it can also be fixed with embedded parts. Our company provides free dimension drawings.

4.Tent optional accessories:
