FQA:

1. What is an Arcum Tent?

Arcum tents are characterized by their unique curved roof design, which combines the structural benefits of traditional A-frame tents with an elegant arch. This design not only enhances the aesthetic appeal but also maximizes interior space by eliminating internal support columns.

2. What sizes are available for Arcum Tents?

Arcum tents come in a range of sizes. The span width typically ranges from 3 meters to 60 meters, and the length is modular, allowing for extension in increments of 3 or 5 meters without any limit. This flexibility makes them suitable for various events, from small gatherings to large-scale exhibitions.
