Ridge height	3m--12m

#### Here is a step-by-step guide to help you through the process:

##### 1. Planning and Preparation

Determine the Size: Calculate the size of the tent based on the number of guests and the layout required for the event. Consider space for seating, dining, dance floor, and other amenities.

Site Selection: Choose a flat and clear area to set up the tent. Ensure the ground is suitable for anchoring and there are no overhead obstructions.

Permits and Regulations: Check local regulations and obtain any necessary permits for erecting a temporary structure.

##### 2. Gather Materials and Tools

Aluminum Frame Components: Poles, joints, and connectors.

PVC Fabric: For the canopy and sidewalls.

Anchoring Equipment: Stakes, weights, or screws depending on the surface.

Tools: Hammer, wrench, drill, measuring tape, ladder, and safety gear.

##### 3. Frame Assembly

Lay Out the Frame: Arrange all the frame components on the ground according to the tent's layout. Organize them by sections (roof, walls, supports).

Assemble the Base: Connect the base poles using the connectors. Secure the connections tightly to form a stable base structure.

Erect the Uprights: Attach the vertical poles to the base. Ensure they are evenly spaced and securely connected.

Install the Roof Frame: Connect the roof beams to the top of the upright poles. Make sure the roof structure is properly aligned and secure all joints tightly.

##### 4. Installing the PVC Canopy

Unfold the PVC Fabric: Lay out the PVC canopy on the ground next to the frame. Ensure it is clean and free from any damage.

Attach the Canopy: Start from one end of the frame and gradually pull the canopy over the roof frame. Secure it using ropes, straps, or bungee cords provided with the tent.

Secure the Canopy: Attach the canopy firmly to the frame using clips or ties. Ensure there are no loose or sagging areas.

##### 5. Adding Sidewalls and Accessories

Install Sidewalls: Attach the PVC sidewalls to the frame. They usually come with Velcro or zippers for easy installation and removal. Ensure they are tight and properly aligned.

Secure the Tent: Use stakes or weights to anchor the tent to the ground. For concrete or paved surfaces, use expansion screws or heavy-duty weights.

Add Doors and Windows: If the tent includes doors or windows, install them according to the manufacturer's instructions. Ensure they are functional and secure.

##### 6. Finishing Touches

Check Stability: Walk around the tent and check all connections, stakes, and ties to ensure everything is secure and stable.  
Decorate: Add interior decorations such as drapery, lighting, and furniture as per the wedding theme.  
Safety Inspection: Ensure there are no sharp edges or trip hazards. Check that exits are accessible and that the tent is stable in windy conditions.

**FQA:**

**Q1.Does your company accept customized tent?**

A:Yes, we can make the tent according to our customers different need.

**Q2.Does your company is a factory?**

A:Yes, we are a factory, so our price is really reasonable, but with high quality.

**Q3. Does your company provide any help to install the tent?**

A:Yes, usually we will send manul instruction and CD to help our customers to install the tent.

**Q4. Does your tent can move to the other place after set up?**

A:Yes, the main frame of our tent is aluminum, so it is light in weight but with high strength, that is very easy to set up and dismantle.
