6m diameter	280kg	0.8	26mm diameter
7m diameter	380kg	1	28mm diameter
8m diameter	460kg	1.2	28mm diameter

Characteristic of the tent

1. The frame consists of high-quality aluminum profiles and steel structure, which is solid and safe.
2. Sunshade cover made of high grade synthetic fiber plus double-layer PVC material has the advantages of high strength, wind resistance, rainproof, sunproof, flame retardant and so on.
3. Easy to install and disassembled, which is easy for transportation and storage.
4. Not need supporting pillars, modular structure, can be built according to the site.

Here are the principles behind its design:

1. Double Decker Structure:

The tent features two levels or decks, providing increased floor space without significantly expanding the tent's footprint. This design allows for separate areas for different purposes, such as sleeping quarters on one level and a lounge or dining area on the other.

2. Dome Roof Design:

The dome-shaped roof offers several advantages, including increased interior height, efficient water runoff, and improved wind resistance. The curved design of the roof distributes weight evenly, enhancing stability and structural integrity. Dome roofs also provide a visually striking appearance, adding aesthetic appeal to the tent structure.

3. Modular Construction:

Dome Roof Double Decker Tents are often designed with a modular construction, allowing for easy assembly, disassembly, and customization. Modular components enable tents to be tailored to specific requirements, such as size, layout, and amenities. This flexibility makes the tents suitable for various applications, including events, accommodations, and temporary shelters.

4. Durable Materials:

High-quality materials are used in the construction of Dome Roof Double Decker Tents to ensure durability and longevity. Weather-resistant fabrics, such as PVC-coated polyester or canvas, are commonly employed to withstand harsh outdoor conditions. Reinforced framework, such as aluminum or steel, provides structural support and stability, even in challenging environments.
