6	78.5	3	Φ20*1.6
8	28.26	4	Φ32*2
10	28.26	5	Φ32*2
15	28.26	6.5	Φ38*3
20	28.26	8	Φ42*3
25	28.26	10	Φ42*3
35	28.26	13	Φ68*3

Several common materials are frequently utilized in their construction:

1. Polyester:

Polyester fabric is a popular choice for dome house tents due to its durability, resistance to tearing, and waterproof properties. It typically features a polyurethane (PU) or silicone coating to enhance water resistance and protect against UV radiation. Polyester is lightweight and quick-drying, making it suitable for outdoor use in various weather conditions.

2. Nylon:

Nylon is another common material used in dome house tents, prized for its lightweight nature, strength, and abrasion resistance. Similar to polyester, nylon fabrics are often treated with waterproof coatings to improve water resistance and durability. Nylon tents are known for their packability and versatility, making them popular among backpackers and adventure seekers.

3. Canvas:

Canvas tents offer superior durability and longevity compared to synthetic fabrics like polyester and nylon. Canvas is a heavy-duty material made from cotton fibers, known for its breathability, insulation, and resistance to harsh weather conditions. While canvas tents are heavier and bulkier than their synthetic counterparts, they provide excellent comfort and stability, making them suitable for long-term camping and glamping.

4. Polyethylene (PE):

Polyethylene is a durable and waterproof material commonly used for tent floors and ground cloths. While not typically used for the tent canopy itself, polyethylene may be incorporated into the construction of dome house tents to provide additional protection against moisture and punctures.

5. PVC (Polyvinyl Chloride):

PVC-coated fabrics are occasionally used in dome house tents, particularly for larger or more heavy-duty models. PVC provides excellent waterproofing and durability, making it suitable for tents intended for extended outdoor use or commercial applications. However, PVC fabrics are heavier and less breathable than polyester or nylon, and they may be less environmentally friendly due to concerns about plastic pollution and chemical off-gassing.

FQA:

what is feature of dome tent ?

Geodesic dome tent,geodesic dome greenhouse for sale consist of 100*48*3mm alumium alloy and 650-850g/sq.m PVC fabric.Which is widely used for all kinds of exhibition booth, Easy to install and transport.
