Product Description

Waterproof Event Marquee Heavy Duty Marquee Tent For Party Wedding Outdoor

Our principle:

Structural Stability and Safety:

Wind Load Capacity: Tents must be designed to withstand specific wind speeds as per DIN (Deutsches Institut für Normung) standards. This includes calculations for wind pressure and structural reinforcements to prevent collapse.

Snow Load Capacity: Tents in regions prone to snowfall must meet requirements for snow load capacity to ensure they can bear the weight of accumulated snow without structural failure.

Seismic Resistance: In seismic zones, tents may need to comply with additional requirements to withstand earthquake forces.

Material Quality:

Fabric Standards: Tent fabrics must meet strict standards for strength, durability, UV resistance, and fire retardancy (DIN 4102 B1 or B2 classification).

Frame Materials: Frames are typically made from high-quality materials such as aluminum or steel that meet corrosion resistance and load-bearing capacity requirements.

Fire Safety:

Flame Retardancy: Tents used in public spaces or for events are required to be fire-resistant and comply with DIN 4102 standards for fire behavior of building materials and components.

Assembly and Installation:

Installation Guidelines: Quality requirements may specify guidelines for assembly and installation, including proper anchoring methods and structural stability checks.

Certified Installers: Some regulations may require tents to be installed by certified professionals to ensure compliance with safety standards.

Environmental Standards:

Environmental Impact: Manufacturers and suppliers may need to adhere to environmental regulations regarding materials used, waste management, and recycling practices.

Sustainability: Increasingly, there is a focus on using eco-friendly materials and sustainable practices in tent production to minimize environmental impact.

Certifications and Compliance:

CE Marking: Tents sold in the European Union must bear the CE marking, indicating compliance with EU health, safety, and environmental protection requirements.

TÜV Certification: Some tents may undergo voluntary testing and certification by TÜV (Technischer Überwachungsverein), ensuring they meet high safety and quality standards beyond legal requirements.

Description :

Product Name	Waterproof Event Marquee Heavy Duty Marquee Tent For Party Wedding Outdoor
Roof Cover	Double PVC Coated Polyester Textile
Wind Loading	100-120km/H
Hot Sale Size	20*30M 15*30M 30*50M
Ground Situation	Grass Land, Earth Land, Asphalt Ground, Cement Ground
Function	Party/ Wedding / Catering/ Ceremony/ Church

FQA:

Q: How can i get the price?
