Waterproof Storage Tent PVC Church Tent For Event Wedding Party Outdoor

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Big tent
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Storage Tent
- Application: Outdoor
- Pole Material: Aluminum
- Frame Material: High Reinforce Aluminum
- Roof Cover: 850 G/㎡ For Tent Roof
- Side Wall: 650 G/㎡ For Tent Roof
- Fixing Solution: Steel Anchor, expansion Screws, loading Plate
- Temperature Rate: -30°to +70°temperature
- Highlight: PVC Church Storage Tent, Event Wedding Party Storage Tent, Outdoor Waterproof Storage Tent

Product Description

Waterproof Storage Tent PVC Church Tent For Event Wedding Party Outdoor

Product technology include:

Frame Materials and Design: Storage tents utilize lightweight yet robust materials for their frames, such as galvanized steel, aluminum, or high-strength alloys. These frames are designed to provide structural integrity and support the weight of the tent covering.

Covering Materials: The tent fabric or covering is typically made from durable materials like PVC (polyvinyl chloride) or PE (polyethylene). These materials are chosen for their weather resistance, UV protection, and ability to withstand wear and tear over extended periods.

Weather Resistance: Modern storage tents incorporate advanced weatherproofing technologies to protect stored items from rain, snow, UV rays, and wind. Options may include waterproof coatings, reinforced seams, and UV-resistant treatments to prolong the lifespan of the tent and its contents.

Customization Options: Storage tents can be customized in various ways to suit specific storage needs. This includes options for insulation, flooring systems, ventilation systems, and access points (e.g., roll-up doors or zipper openings) tailored to the environment and items being stored.

Modular and Expandable Design: Many storage tents feature modular designs that allow for easy expansion or reconfiguration as storage needs change. This flexibility is achieved through modular components that can be added or removed to adjust the tent's size and layout.

Assembly and Portability: Storage tents are designed for ease of assembly and portability. They often utilize a simple bolt-together assembly system that requires minimal tools and labor. This makes them suitable for rapid deployment and relocation to different sites as needed.

Safety and Security Features: To ensure the safety of stored items, storage tents may include features such as anchoring systems for stability in adverse weather conditions, fire-retardant materials, and optional security enhancements like locking mechanisms for doors.

Description :

Frame Material	Hard pressed Aluminum Alloy
Cover Material	650-850g/sqm, Double Coated PVC Fabric, Flame Retardant to DIN 4102,M2,Grade B1
Side Wall	PVC Wall, Glass Wall, ABS Wall, Sandwich Wall
Span Width	From 3m to 50m
Eave Height	2.5m, 3m, 4m, 5m or Customized
Life Span	15-20 Years
Max allowed wind Load	80-100km/hour
Features	Water Proof, UV Resistance, Flame Retardant (DIN4102,B1,M2)
Application	Wedding, Party, Event, Exhibition, etc

Span Width	Bay Distance	Side Height	Ridge Height	Roof Pitch	Aluminium Profile
12m/39.4'	3m	2.6m	4.8m	20	100x48x3mm

FQA:

What is a storage tent?

A storage tent is a temporary structure made of durable materials such as fabric or PVC, supported by a frame. It is used to store goods, equipment, or vehicles outdoors, providing protection from weather elements like rain, sun, and wind.

What are the advantages of using a storage tent?

Storage tents offer mobility, cost-effectiveness, and quick deployment compared to permanent buildings. They are customizable in size and configuration, making them suitable for various storage needs in industries like construction, agriculture, events, and emergency response.

How durable are storage tents?

Modern storage tents are designed to withstand various weather conditions and can be reinforced with features like waterproofing, UV resistance, and sturdy frames. Their durability makes them suitable for long-term storage solutions with proper maintenance.

Can storage tents be customized?

Yes, storage tents can be customized with features such as insulation, flooring, lighting, and ventilation to meet specific storage requirements. They can also be expanded or relocated as needed, offering flexibility in response to changing storage needs.

What are common applications of storage tents?

Storage tents are used in construction sites for materials and equipment storage, in agriculture for sheltering crops and machinery, at events for temporary warehouses, and in disaster relief efforts for storing supplies and equipment.
