## Product Description

### Aluminum Frame Sport Tent A-Shape Roof Tent For Basketball Football Tennis Etc

#### Introduction:

Aluminum alloy sports tent is a sports place solution using aluminum alloy material as the main frame structure.

This kind of tent has many remarkable advantages. First of all, the aluminum alloy has excellent strength and corrosion resistance, which can ensure that the tent remains stable and strong in long-term use, and adapt to various weather conditions, including strong winds, heavy rain and other harsh environments.

Its frame design is usually light but strong, easy to set up and disassemble, but also easy to transport and store.

In terms of tarpaulin, high-quality waterproof, fireproof, anti-ultraviolet materials are generally selected to provide good protection and a comfortable environment for the internal sports space.

The interior space of the aluminum alloy sports tent is spacious and can be flexibly arranged according to different sports items and needs.

Whether it is basketball, football, tennis and other regular sports, or some niche sports, can be reasonably arranged in it.

In addition, it can also be equipped with perfect lighting, ventilation, air conditioning and other facilities to enhance the user experience.

Aluminum alloy sports tent because of its flexibility, rapid construction and cost effectiveness, widely used in all kinds of sports events, training venues, outdoor expansion activities and other scenes, to provide people with a convenient and practical sports space.

#### FQA:

##### 1.Can you print our logos on the tent?

Yes. Customized logos can be printed on the tent fabric according to your requirements.

##### 2.Does your tent be able to install repeatedly?

Our tents can be assembled and dismantled and repeatedly with small transportation distance. The lifespan of aluminum framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

##### 3.Is your tent strong and stable enough? How about the wind loading?

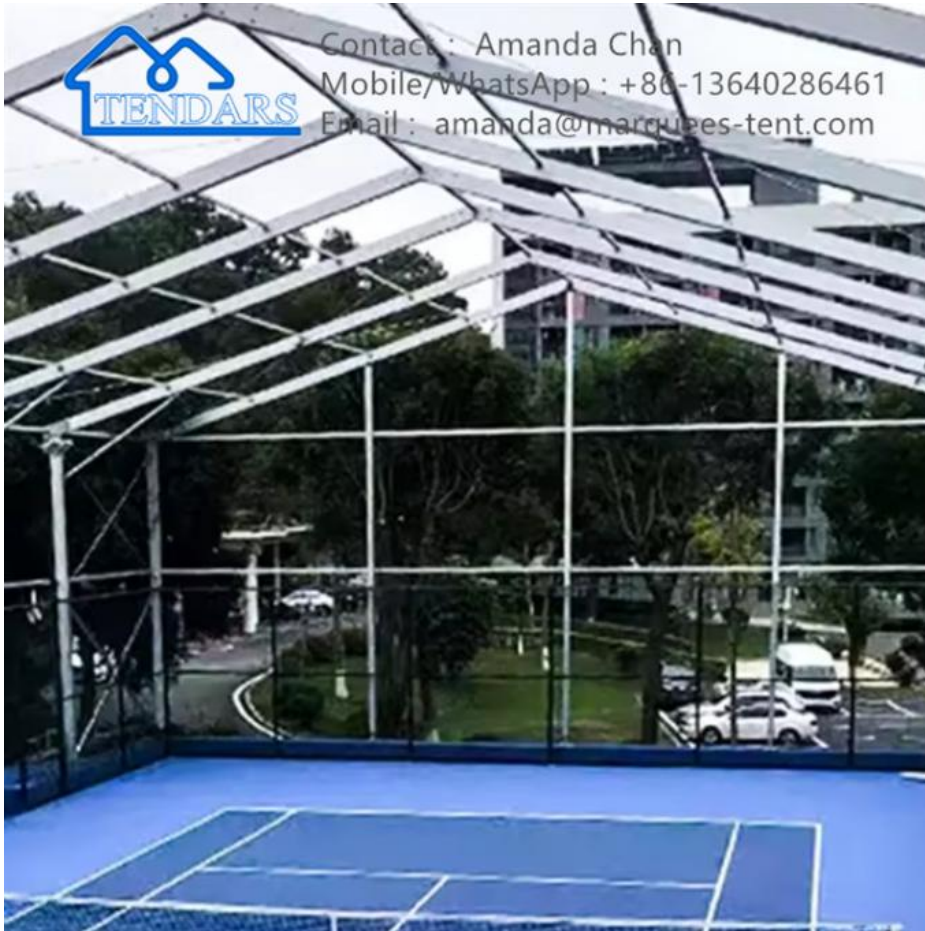

Yes. The main frameworks (upright support and roof beam) are manufactured with high impact extruded anodized aluminum (6061/T6). So our tent structure is safe and strong and can resist wind speed up to 100 km/hr.

##### 4.How long is the warranty period?

Guarantee one year. During the warranty period, we shall repair and replace the damaged part accordingly because of any damage due to quality problem. Not including man-made damage or accident damage.
