## Product Description

### Outdoor Camping Shell Shade Tents House Resort Luxury Tent For Glamping

#### Key Features of Camping Shell Shade Tents:

**Innovative Design:** The shell-like design of these tents sets them apart from traditional camping shelters. Inspired by natural forms or futuristic aesthetics, the curved and streamlined shape not only enhances visual appeal but also contributes to aerodynamic efficiency and weather resistance.

**Ease of Setup:** Camping shell shade tents are engineered for quick and straightforward setup. Many models feature pop-up or collapsible designs that allow them to be assembled in minutes, eliminating the need for complicated poles or extensive assembly instructions.

**Portability and Compactness:** Designed with portability in mind, these tents are lightweight and compact when folded, making them easy to transport and store in a car trunk or backpack. This makes them ideal for car camping, backpacking trips, festivals, and other outdoor adventures.

**Weather Protection:** Despite their minimalist appearance, camping shell shade tents offer reliable protection from sun, wind, and light rain. The durable materials used in their construction, such as UV-resistant fabrics and water-resistant coatings, ensure comfort and safety in changing weather conditions.

**Versatility:** Camping shell shade tents are versatile in their application. They can serve as shade shelters for daytime activities like picnics or beach outings, as well as provide comfortable sleeping quarters during overnight camping trips.

#### Our Advantages

- 1) Customization service We are professional OEM /ODM. We can surely help you design as long as you tell us your specific requirements.
- 2) Excellent quality control All products will be tested before shipping by our skilled technicians.
- 3) Efficient cooperation Our prompt responsible and helpful reply will ensure your happy purchasing.
- 4) Great after service Guarantee 2 years. During the warranty period, we shall repair or replace the damaged part accordingly because of any damage due to quality problem. Not including man-made damage or accident damage.

#### Product Description:

Material	Truss structure, mild steel; Stainless steel, aluminum alloy 6082-T6 truss, Q235B steel
Coating	Spray Painting; Galvanization; Powder Coated Hot galvanized
Finishing treatment	Hot Dip Galvanization or Painting
Fabrication	1100g PVDF, Flame retardant B1, mildew proof, 100% waterproof and UV proof
Max Wind	150 KM/H
