## Product Description

### Outdoor Pyramid Camping Tipi Tent Teepee Tent For Camp Hunting Vacation Etc

Here are the key features typically found in a pyramid camping tipi tent:

**Shape and Design:** The tent is shaped like a pyramid or tipi, characterized by a single center pole that supports the structure. This design provides ample headroom and a spacious interior, making it suitable for both sleeping and socializing.

**Material:** Pyramid camping tipi tents are often made from durable and weather-resistant materials such as canvas or polyester. Canvas tents offer excellent breathability and insulation, while polyester tents are lightweight and quick-drying.

**Ventilation:** Many pyramid tents include ventilation features such as windows, mesh panels, or adjustable vents near the top of the tent. This helps regulate airflow and reduce condensation inside the tent.

**Setup:** These tents are designed for easy setup and takedown. The center pole is typically collapsible or extendable, and the tent fabric may feature pre-attached guy lines and stakes for stability in windy conditions.

**Capacity:** Pyramid camping tipi tents come in various sizes to accommodate different numbers of campers. They range from compact models suitable for solo camping to larger versions that can accommodate families or groups.

**Interior Space:** The design maximizes interior space with steep sidewalls and a peak height that allows occupants to stand upright near the center pole. This makes it easier to move around and store gear inside the tent.

**Weather Protection:** The sturdy construction and weather-resistant materials provide protection from rain, wind, and UV rays. Some tents may feature optional ground tarps or footprints to further protect the tent floor.

#### Product Description:

Product Name	Pyramid Camping Tipi Tent
Frame Structure	Smthetic preservative wood
Product Material	Polyester cotton / waterproof flame retardant canvas
Application	Camp constructure,tourist attractionseco,park,restaurant etc..
Outer Material	Oxford or customize
Wind Load	100-120 km/h (0.5KN/sqm)

#### FQA:

##### Q1. Are you factory or trade company?

We are direct factory.

##### Q2. What is your Payment terms?

T/T is available.

##### Q3. Is your tent strong and stable enough,How about the wind loading?

Yes, Steel structure and cover wind resistance and load bearing is calculated by professional software and Experienced engineer team , will be more than we planned 50%.The wind load at least more than 80KM/H.

##### Q4. What's the material of the cover,does it can last long time?

The cover material is PVDF or PTFE.PVDF can last more than 15-20 years.PTFE can last more than 50 years.It have fabric inside,so it very strong ,not easy to be torn.

##### Q5. When will you ship the orders?

Once the design of tent is confirmed, we will arrange production plan, and inform you of the leadtime, generally it takes about 7-25 working days.

##### Q6. What is the total price include freight?

The total price is based on the design of the product and the requirements of the customer, all subject to the final calculation.
