Product Description

Pvdf Safari Camp Hotel Tent WaterProof Fire Retardant Tent For Glamping Resort

PVDF Safari Hotel tents offer the following significant advantages:

Excellent weather resistance

PVDF (polyvinylidene fluoride) coating has excellent UV resistance, acid and alkali resistance and corrosion resistance, which can maintain good performance in a variety of harsh outdoor environments for a long time and extend the service life of the tent. For example, in the strong sunlight and changeable climate conditions, the tent is not easy to fade, age or damage.

High strength and stability

The structure of the tent is strong and can withstand the test of extreme weather such as strong winds and heavy snow, providing a safe and reliable living environment for guests. Even in the case of strong winds, it can remain stable and will not easily deform or collapse.

Good water resistance

Effectively prevent rain infiltration, keep the inside of the tent dry, so that guests can have a comfortable accommodation experience in rainy days. For example, in the rainstorm weather, there will be no water leakage, ensuring that the sleep of residents is not affected.

Self-cleaning capability

PVDF surface is relatively smooth, not easily contaminated with dust and dirt, and rain can achieve a certain degree of self-cleaning, reducing maintenance costs.

Beautiful and unique

Can present a unique look and texture, blend with the natural environment, add a unique charm to the hunting camp. For example, its unique appearance can attract more visitors and enhance the attraction of the camp.

Thermal insulation performance

Helps to adjust the temperature inside the tent, keep warm in the cold winter, keep cool in the hot summer, and improve the comfort of guests.

Environmental protection and sustainability

Is a relatively environmentally friendly material, can be recycled, in line with the concept of sustainable development.

Product Description:

The loft luxury safari tent is made by $\phi 80\text{mm}$ plywood wood pole frame with galvanized steel accessories. And it uses 850g/sqm PVC coated polyester as outer canvas material, which is waterproof and fire-resistant. Inner material is made of 900D oxford cloth fabric. Nature proof with durable construction and canvas yet visually appealing, our safari mobile tents will feed your imagination at first glance. The inner space in luxury tent lodge consists separate parts. This allows us to extend your luxury tent or replace a part if necessary. The unique end couplings to extend the life of your tent. The luxury tent lodge has a large balcony in front, and the wooden house shape combines the roughness and the natural beauty of the wilderness.
