

Wooden Structure Large Space Outdoor Glamping Hotel Tent For Yourself Require

Our Product Introduction

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Truss Frame
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Outdoor Glamping Hotel Tent
- Structure: Assembled Structure
- Building Type: Construction Based On Need
- Cover Materials: PVDF/PTFE/ETFE
- Weave Style: Woven Fabric P 2/2
- Total Weight (g/m²): 1050 G/m²
- Total Thickness(mm): 0.83 ± 0.02 Mm
- Guarantee Year: 10~30 Years
- Application: On Your Require
- Highlight: **Wooden Structure Glamping Hotel Tent, Outdoor Glamping Hotel Tent, Large Space Glamping Hotel Tent**

Product Description

Wooden Structure Large Space Outdoor Glamping Hotel Tent For Yourself Require

Advantages:

- 1). Excellent fire resistance, high temperature resistance, which meets the high requirements of fire protection.
- 2). High security. It has good seismic performance because of its light weight flexible structure and Larger deform-ability.
- 3). Good transmittance. The film has excellent anti ultraviolet and anti-aging properties. The surface of membrane is smooth and elastic, so the dust is hard to penetrate. After scouring, it will restore its original clean surface.
- 4). Low energy consumption ,long lifespan ,heat insulation ,good self-cleaning properties ,production period is short.

Product Description:

Item	Specification
Application	Hotel, tourism or on your requirements
OEM Item	Size, color, shape, material are all acceptable.
Membrane Type	Application 100% polyester base fabric, optional PTFE or PVDF ,ETFE coated
Support Frame	GB Q235 steel or galvanized steel
Color	Optional, such as white, red, grey, yellow, blue, green, etc.
Warranty	Under normal circumstances: frame:one year, membrane material:10-20 years OEM case: could be extended according to customer requirements

Here are the main features of membrane structure hotel tents:

Architectural Design:

Unique Aesthetic Appeal: Membrane structures offer distinctive shapes and designs that stand out in outdoor environments, blending harmoniously with natural surroundings or complementing modern architectural styles.

Customizable: They can be customized in terms of size, shape, and color to suit specific aesthetic preferences and site requirements.

Fabric Membrane:

High-Performance Materials: Typically made from durable fabrics such as PVC-coated polyester or PTFE (polytetrafluoroethylene) membranes.

Weather Resistance: Membrane fabrics are weatherproof, offering UV resistance, waterproofing, and protection against extreme temperatures and weather conditions.

Lightweight: Compared to traditional building materials, membrane fabrics are lightweight, reducing structural load and facilitating easier installation and relocation.

Structural Framework:

Support System: Utilizes a steel or aluminum structural framework to provide stability and support for the membrane.

Tensioned Design: The membrane is tensioned over the framework, creating a taut surface that can withstand wind and snow loads while maintaining structural integrity.

Versatility and Adaptability:

Modular Construction: Membrane structures are modular and can be easily expanded, reconfigured, or relocated as needed.

Multi-Functional Spaces: Suitable for various hotel amenities such as guest accommodations, dining areas, lounges, and event spaces, offering flexibility in use.

Sustainability:

Energy Efficiency: Membrane structures can incorporate energy-efficient features such as natural ventilation and daylighting strategies, reducing energy consumption.

Recyclable Materials: Many membrane fabrics are recyclable, contributing to sustainable building practices and minimizing environmental impact.

FQA:

1. How many years have you been in this line?

We've been in this line for more than 10+ years.

2. How to control the quality of the product

We have national level engineers ,We control products quality under the instruction of national standards.

3. Is it acceptable to the customer's OEM, ODM requirements?

We welcome OEM ,ODM order as well.

4. About after-sales

Free parts provided once broken within one year.

5.Can I visit your factory in person?

Of course, welcome.
