Wild Waterproof Luxury Hotel Style Desert Tents Outdoor Glamping Tent Outdoor

Our Product Introduction

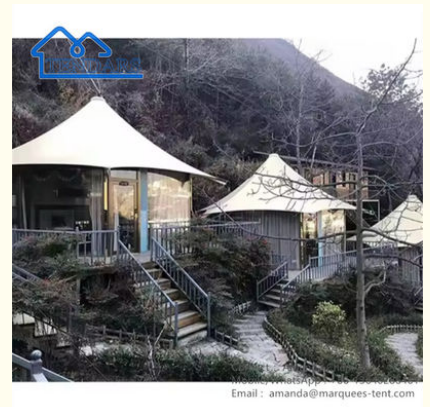

Basic Information

- Place of Origin: Guangdong
- Brand Name: Tendars
- Certification: ISO9001, SGS, Coc, CE
- Model Number: Truss Frame
- Minimum Order Quantity: 25 square meters
- Price: Reconsideration
- Packaging Details: 1, The aluminium frame structure packed into the bubble film 2, the pvc fabric roof cover and sidewalls are packed into the PVC fabric carry bag; 3, Hardware packed into the box.
- Delivery Time: 18days or To be negotiated
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Hotel Style Desert Tents
- Outside Tent Waterproof Index: <1000 Mm
- Bottom Waterproof Index: >3000 Mm
- Building Type: Construction Based On Need
- Cover Material: PVC-coated Polyester Textile
- Frame Material: Aluminum Frame
- Size: 5m, 6m, 8m
- Usage: Hotel, Restaurant, Events, party, Exhibition
- Cover Color: White, Sand Yellow, Red, Black, Silver-gray
- Style: Luxury Roof Top Tent
- Highlight: **Outdoor Glamping Tent, Outdoor Hotel Style Desert Tents, Waterproof Luxury Hotel Style Desert Tents**

Product Description

Wild Waterproof Luxury Hotel Style Desert Tents Outdoor Glamping Tent Outdoor

Key Features of Membrane Structure Hotel-Style Desert Tents

Membrane Technology:Material: The primary component is a high-performance membrane, often made from materials like PVC-coated polyester, PTFE (polytetrafluoroethylene), or ETFE (ethylene tetrafluoroethylene). These materials are chosen for their durability, UV resistance, and weatherproof qualities.Design: The membrane is typically stretched over a framework to create a tent-like structure. It can be shaped into various forms, such as domes, arches, or canopies.

Framework:Structure: The membrane is supported by a framework made of lightweight yet strong materials like aluminum or steel. This framework can be designed to withstand harsh weather conditions, including high winds and heavy rains.Modular Design: Many hotel-style desert tents feature modular frameworks that allow for easy assembly, disassembly, and reconfiguration.

Product Description:

Membrane structure which called tension membrane structure ,is a new kind of building structure.It through the steel frame,steel column or wire make the membrane material produce a certain tension in order to form a certain space shape,composition can bear a certain tension stability catenary system.Membrane structure of the membrane material should be made concave and convex space curved surface to ensure its stability,so the membrane structure is called space membrane structure as well.

Frame	Aluminium frame
Cover Material	High-density waterproof PVC
Optional Accessories	Log folding table, folding stool, Bonfire stand, wooden floor, triangular porch, Entrance porch, Open porch
Purpose	Scenic camping site, homestay camping site, featured glamping site, gathering events, landscape, featured restaurant, etc.

Advantages:

A. Cost efficiency

Tension membrane architecture offers both the structure and the roofing shell in one. Depending upon the requirements, shaped fabrics under

tension can span large areas at dramatically reduced costs compared with conventional roofing systems. They are also erected more efficiently reducing costs even further.

B. Design Freedom

Being a flexible and highly formable systems, tensile fabric membranes are able to be formed into breathtakingly spectacular designs. This allows architect to do things unthinkable with conventional construction materials. A well designed tensile structure instantly adds to a buildings aesthetics, whilst improving its functionality.

FQA:

Q: Can you print our logos on the tent?

Yes. Customized logos can be printed on the tent fabric according to your requirements.

Q: Is that factory price?

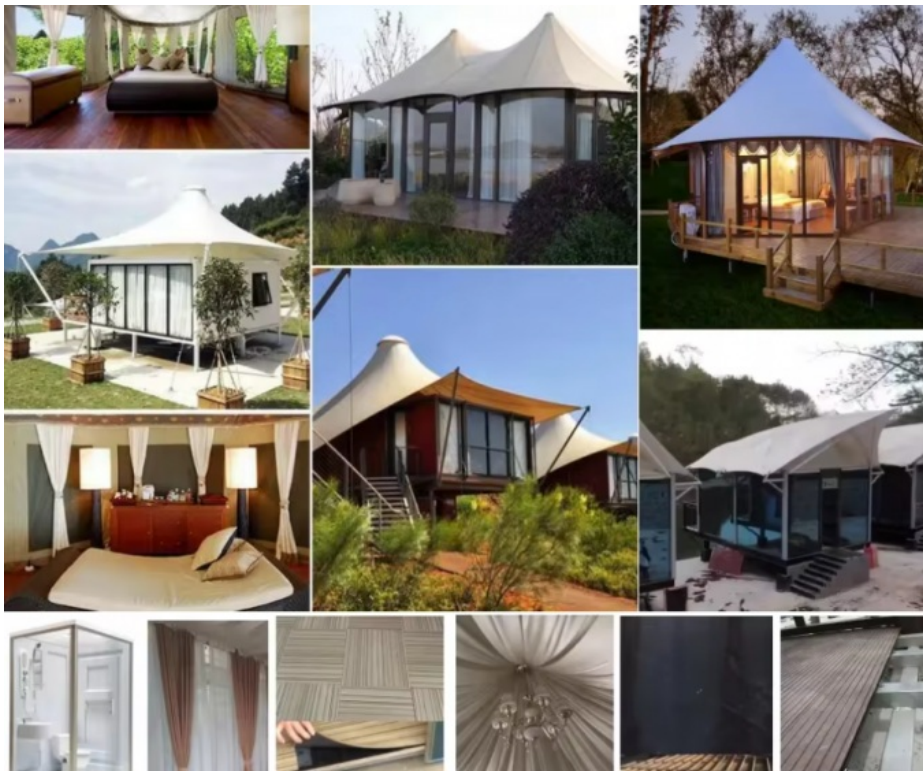

Yes. We assure you all prices are based on factory.

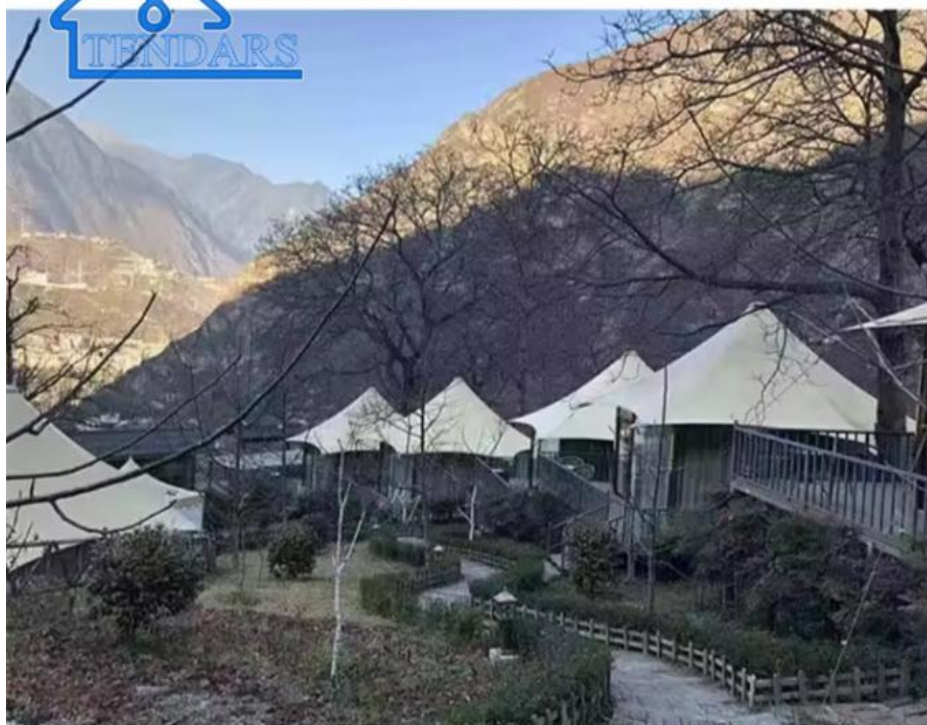

Q: Does your tent be able to installed repeatedly? What is the life span?

Our tents can be assembled and dismantled easily and repeatedly with small transportation size. The lifespan of aluminium framework can reach 15-20 years, and 5-8 years for PVC fabrics depending on different conditions of usage.

Q: What documents are available?

A full range documents including structural drawings, packing list, installation manual and relative certificates can be provided. Moreover, customs declaration is provided. We provide one-stop service for you.
