

Fully Customizable Size Party Marquee Tent with 650gsm PVC Cover and Hot-Dip Galvanized Steel Frame

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO 9001:2015, CE, SGS, FR Certificate
- Model Number: Tendars
- Minimum Order Quantity: 100sqm
- Price: \$35/sqm
- Packaging Details: Reinforced PVC carry bag, steel frame wrapped in foam, export-grade wooden pallet
- Delivery Time: 10-20 working days for tailored orders
- Payment Terms: T/T,L/C,Western Union
- Supply Ability: 300 Sets per Month

Product Specification

- Cover Material: 650gsm PVC Laminated Polyester
- Frame Material: Hot-Dip Galvanized Steel Q235
- Eave Height: 2.5m – 4.0m Customizable
- Snow Load Capacity: Up To 0.5 KN/m²
- Wind Rating: Up To 100 Km/h
- Width Customization: 4m To 25m Fully Tailored
- Highlight: **Tailored Length Width Party Tent, Fully Customizable Marquee Size, Heavy Duty 650gsm PVC Cover**

Product Description

Fully Customizable Size Party Marquee Tent Tailored Length Width Height Configuration Heavy Duty 650gsm PVC Cover

Fully Customizable Size Party Marquee Tent

Our tendars tent is a heavy-duty party marquee tent designed with a fully tailored size configuration system. Unlike standard off-the-shelf tents, every dimension — **length, width, and height** — can be customized to your exact specifications, ensuring a perfect fit for your venue and event requirements.

Key Features

Full Dimensional Customization: Configure width from 4m to 25m, length in 3m bay increments to any required span, and eave heights from 2.5m to 4.0m

Heavy Duty Steel Frame: Hot-dip galvanized Q235 steel structure with reinforced connectors for superior strength and long-term outdoor use

650gsm PVC Cover: Commercial-grade laminated PVC polyester fabric with fire retardant certification (BS 7837 / NFPA 701)

High Wind Resistance: Engineered to withstand wind speeds up to 100 km/h with proper anchoring

Snow Load Rated: Designed for 0.5 kN/m² snow load capacity, suitable for winter events

Flexible Sidewall Options: Choose solid PVC walls, transparent window panels, or open bay configurations

Professional Engineering: Each custom-sized structure undergoes structural calculation based on your local wind and snow load requirements

Tailored Size Configuration Process

Requirements Gathering: Specify your desired footprint, event type, occupancy, and location

Structural Engineering: Our engineers calculate wind and snow loads for your region and design the frame accordingly

CAD Approval: Receive detailed engineering drawings for your review and approval before production

Precision Manufacturing: Frame sections and covers are fabricated to your exact dimensions

Pre-Delivery Assembly: Complete test assembly and quality inspection in our factory

Export Packaging: Secured on wooden pallets with labeled components for efficient on-site assembly

Applications

Ideal for large wedding receptions, corporate galas, exhibition halls, sports event shelters, temporary warehouses, and outdoor banquet venues requiring substantial covered space with precise dimensional control.

Specifications

Frame Material	Hot-Dip Galvanized Steel Q235
Cover Material	650gsm PVC Laminated Polyester
Width Range	4m - 25m Tailored
Length Range	Any Length by 3m Bays
Eave Height	2.5m - 4.0m Customizable
Ridge Height	4.0m - 8.0m by Width
Snow Load	Up to 0.5 kN/m ²
Wind Rating	Up to 100 km/h
Fire Retardancy	BS 7837 / NFPA 701
