Floor System (Optional)	Modular Hardwood Floor Panels with Sub-Frame, Black or Natural Oak Finish
Roof Lining	Ivory Pleated Ceiling Drape with Integrated LED Track
Wind Resistance	Up to 90 km/h (Beaufort Scale 10) with Anchoring System
Snow Load	0.35 kN/m ²
UV Protection	UPF 50+
Temperature Range	-30°C to +70°C
Fire Retardant	B1 / M2 (EN 13501-1 Compliant)
Frame Finish Options	Champagne Gold, Brushed Silver, Matte Black, Rose Gold
Setup Time	3-4 Persons, 4-6 Hours (Professional Assembly Recommended)

Product Advantages & Key Selling Points

360° Panoramic Glass Experience

Floor-to-ceiling **8mm tempered safety glass walls** (EN 12150 certified) create a breathtaking transparent pavilion that connects guests with the surrounding landscape. Perfect for scenic European venues – from Tuscan vineyards to Swiss alpine meadows. Natural light floods the interior during daytime; at night, the illuminated glass structure becomes a stunning architectural centerpiece.

VIP European Hospitality Standard

Designed for **luxury brand activations, VIP corporate hospitality, Michelin-starred dining experiences, and exclusive private celebrations**. The champagne gold aluminum frame, pleated ceiling drapes, and integrated LED track create a five-star ambiance. Matching furniture packages available for a complete turnkey solution.

All-Season Climate Comfort

Optional **integrated HVAC compatibility** with discreet ducting ports, thermal-insulated roof lining, and double-glazed door systems. Comfortable in Scandinavian winter (-30°C with heating) and Mediterranean summer (+70°C with cooling). Anti-condensation roof lining prevents dripping in humid conditions – a critical feature for European coastal venues.

Premium EU Certification Suite

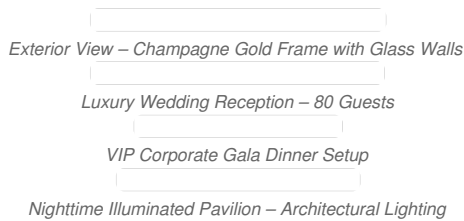

Complete certification package: **CE, EN 13782, EN 12150** (tempered glass safety), **ISO 9001:2015, REACH, and B1/M2 fire safety**. All glass panels are EN 12150 certified with etched safety marks. Full structural engineering calculations provided for European venue approval and insurance requirements.

Certifications & Compliance

Certification	Scope	European Luxury Market Significance
---------------	-------	-------------------------------------

Certification	Scope	European Luxury Market Significance
CE Marking	Complete structural system safety & material compliance	Mandatory EU market access. Essential for luxury venues and high-end event insurers who require CE documentation.
EN 12150	Thermally toughened soda lime silicate safety glass	European standard for tempered safety glass. Each glass panel is individually marked and certified – critical for public event liability insurance.
EN 13782	Temporary structures – Tents – Safety requirements	The definitive European tent safety standard. Required by luxury venues, heritage sites, and municipal authorities for high-end event permitting.
ISO 9001:2015	Quality management – Full production traceability	Essential for luxury brand procurement processes. Demonstrates consistent manufacturing excellence and complete material traceability.
REACH + EN 13501-1	Chemical compliance + Fire safety B1/M2	Combined chemical and fire safety compliance. Mandatory for all EU events. Complete documentation package provided with every order.

European Luxury Event Services & Support

Service	Description
White-Glove Installation	Professional installation team available across Europe. Includes site survey, foundation preparation, structural assembly, glass panel installation, interior finish, and final safety inspection. Full project management for complex luxury events.
Bespoke Design Consultation	Dedicated luxury event design consultant. Custom frame finishes (champagne gold, rose gold, matte black), branded glass etching, bespoke interior draping, and coordinated furniture sourcing. Free 3D visualization and venue integration renderings.
Concierge Logistics	End-to-end logistics management for luxury events across Europe. Climate-controlled transport for glass panels, white-glove handling, venue coordination, and post-event dismantling and collection service.
5-Year Premium Warranty	5-year comprehensive warranty on frame and glass panels. 3-year fabric warranty. Priority European after-sales support with 24-hour response. On-site service available for urgent requirements at luxury event venues.
Rental Program	Flexible rental options for single events or seasonal use. Available from our European partner network in major cities: London, Paris, Milan, Berlin, Barcelona, Amsterdam. Ideal for event planners who need luxury without capital investment.

Frequently Asked Questions (FAQ)

Q1: Are the glass panels safe for public events?

Absolutely. All glass panels are **8mm thermally toughened safety glass** certified to **EN 12150** – the European standard for tempered safety glass. Each panel is individually marked with the EN 12150 certification etching. In the unlikely event of breakage, the glass shatters into small, blunt fragments rather than dangerous shards, meeting all EU public safety requirements.

Q2: Can this tent be used in winter conditions?

Yes. The PT-LUX-12X6-EU is engineered for **year-round European use** with optional HVAC integration. The glass wall system creates an excellent greenhouse effect during sunny winter days, while the thermal-insulated roof lining and optional heating systems maintain comfortable interior temperatures even at -30°C. Snow load capacity of 0.35 kN/m² handles typical European winter conditions.

Q3: Do you offer rental options for single events?

Yes. Through our **European luxury event partner network**, we offer flexible rental packages for single events, weekend hire, or seasonal use. Rental includes delivery, professional installation, on-site support during the event, and dismantling.

Available in major European cities: London, Paris, Milan, Berlin, Barcelona, and Amsterdam.

Q4: What is the minimum order quantity?

The MOQ is **1 set**. We understand that luxury event companies often need a single premium pavilion for flagship events. Custom frame finishes and bespoke branding available from 1 unit. Volume discounts apply for orders of 3+ units.

Q5: Can you match specific brand colors for corporate events?

Yes. We offer **custom RAL and Pantone color matching** for the aluminum frame finish (anodized), roof fabric, interior draping, and even glass panel framing. Digital color proofs provided for approval. This service is particularly popular for luxury automotive brands, fashion houses, and premium beverage companies hosting brand events across Europe.

Q6: What documentation is provided for venue approval and insurance?

Every order includes a **comprehensive documentation package**: CE Declaration of Conformity, EN 13782 structural test reports with wind load calculations, EN 12150 glass safety certificates, REACH compliance statement, B1/M2 fire certificates, full engineering drawings, and assembly instructions. These documents are accepted by luxury venues, heritage properties, and event insurers throughout Europe.

Create unforgettable moments in Europe's most beautiful locations. Contact our luxury events team today for a personalized consultation, complimentary 3D venue visualization, and tailored quotation. Multilingual service in English, French, German, Italian, and Spanish.
