Product Description

Christmas Market Festival Party Marquee Tent - Winter Ready

Extend your event season through winter with our Christmas Market Festival Party Marquee Tent, engineered specifically for cold climate operation. With a 0.5kN/sqm snow load rating (upgradeable to 1.0kN/sqm for Alpine regions), a steep 25-degree roof pitch for optimal snow shedding, and a comprehensive thermal insulation package, this structure keeps your festive market warm, safe, and welcoming from November through February.

The European style wooden frame finish captures the traditional Christmas market aesthetic while maintaining the structural advantages of 6061 T6 aluminum alloy. Compatible with indirect diesel heaters, electric infrared panels, or gas catalytic heating systems, the insulated configuration maintains comfortable interior temperatures even at -30°C outside ambient.

Christmas Market Case Study - Vienna Style Market, Germany

Client: Municipality organizing annual 6-week Christmas market with 40 vendor stalls.

Solution: 20 interconnected 5x5m marquee tents with wooden finish frames, transparent PVC walls for product display, infrared heating panels, and integrated LED festive lighting. Central 10x20m tent for communal dining and live music.

Result: Market operated successfully through heavy snowfall events. Vendor satisfaction scored 4.8/5. Municipality extended contract for 5 additional years. Winter tent system repurposed for spring beer garden and autumn harvest festival.

Winter Operation Features

25° roof pitch: Natural snow shedding, no accumulation on structure

Double layer roof: 50mm air gap between layers creates thermal barrier

Condensation management: Vapor barrier and ventilation system prevents interior dripping

Heated entrance: Air curtain or vestibule options maintain interior temperature

Non-slip flooring: Textured surface for wet and icy conditions

Emergency snow removal: Roof access and snow rake included in winter kit
