Frequently Asked Questions

Q: Do I still need CE marking for UK import after Brexit?

A: UKCA marking has replaced CE for the GB market. However, we provide dual marking where available during transitional periods. Northern Ireland has separate UKNI requirements which we support.

Q: Is BS 7837 different from the EU fire standard?

A: BS 7837 is the British Standard specifically for textile structures at events. It covers fire safety, structural stability, and installation. We provide test reports demonstrating compliance.

Q: How long does UK customs clearance take with your documentation?

A: With our complete UK customs package, typical clearance is 1-2 working days at UK ports. We provide the EORI number documentation your customs broker needs.
