Display Walls	White panels 2.5m height	Gallery standard hanging surface
Climate Control	20C plus minus 2C humidity 50 percent plus minus 5 percent	Artwork preservation environment
Security System	Camera mounting alarm integration	Artwork protection overnight
Flooring	Polished concrete or wooden cassette	Professional gallery presentation
Light Control	Blackout roof option	UV-sensitive artwork protection

**Key European Market Features**

Museum-grade 95 CRI lighting renders artwork colors with gallery accuracy  
 Climate control system maintains conservation-grade environment for valuable artworks  
 White display walls with gallery hanging rail system for flexible artwork placement  
 Security system integration with camera mounts and alarm circuits  
 Environmental monitoring data logging for insurance and lending institution requirements

**Frequently Asked Questions**

**Q: Can this tent meet museum lending institution requirements?**

A: Yes. The climate control system maintains temperature 20C ±2C and humidity 50% ±5%, meeting standard museum loan conditions. Environmental data logging provides documentation for lenders.

**Q: How much wall hanging space does a typical configuration provide?**

A: A 10x20m configuration provides approximately 60 linear meters of display wall. We can add freestanding display panels for additional hanging space.

**Q: Is the lighting suitable for photography of artworks?**

A: The 3000K 95 CRI lighting provides excellent color accuracy for both viewing and photography. We can add supplemental lighting positions for specific artwork highlights.
