Application Cases — American Auto Shows

Event	Location	Configuration	Vehicles Displayed
SEMA Show	Las Vegas NV	20m x 40m clear span with 8 spotlight tracks	12 custom vehicles
New York Auto Show	NYC Javits Center	15m x 30m with turntable power port	8 production vehicles plus concept
Pebble Beach Concours	Monterey CA	10m x 20m luxury configuration	4 classic collector vehicles

Frequently Asked Questions — American Auto Events

Q: Can vehicles actually drive into and out of the tent?

A: Yes. Our 3m wide reinforced ramps support vehicles up to 5 tons. The clear span design allows vehicles to be driven in, positioned, and driven out without disassembling any structure. We provide detailed drive-path planning for multi-vehicle displays.

Q: Is the flooring strong enough for a heavy SUV or truck?

A: Our concrete-look cassettes are rated at 5 tons per square meter — sufficient for a full-size American SUV such as Cadillac Escalade or Lincoln Navigator. For display trucks, we add steel load-spreading plates under tire positions at no extra cost.

Q: Can the tent branding match our automaker client's corporate identity?

A: Absolutely. Full exterior UV printing reproduces automaker logos, vehicle images, and brand colors with Pantone-matched accuracy. We work with your graphics department to ensure brand guideline compliance.
