Finger Lakes NY	June-October	10m x 20m insulated for cool evenings	100 tasting guests
Texas Hill Country	March-November	15m x 20m with cooling upgrade	150 tasting guests

Frequently Asked Questions — Wine Country Events

Can the climate control maintain proper wine serving temperatures?

Yes. Our ductless mini-split system maintains 16-18°C — the gold standard for wine service. White wines at 8-10°C are handled by individual bottle chillers at the tasting bar. Temperature monitored with digital display for sommelier peace of mind.

Will the tent look elegant enough for a premium wine event?

Absolutely. Our barrel-stave interior panels, warm 2700K lighting, and clear vineyard-view walls create an atmosphere that competes with permanent winery tasting rooms. Many Napa wineries use our tents for harvest parties and allocation events.

How does the tent handle rain during a vineyard event?

Fully waterproof with 2000mm water column roof and integrated gutter system. Clear walls keep the view while protecting guests. The tent interior remains completely dry even during California atmospheric river storms. We recommend ordering sidewall panels for the prevailing wind direction.
