NFPA 701 Certificate	Fabric flame retardant proof	Fire marshal pre event approval
Wind Load Engineering	PE stamped structural calculations	Parking lot permit application
Liability Insurance	Product liability coverage	Stadium vendor agreement
ADA Access Plan	Accessible route drawing	ADA compliance documentation

Frequently Asked Questions — American Sports Events

Q: Can we grill inside the tent safely?

A: Yes. Our BBQ-safe configuration includes vented sidewall panels and we ensure minimum 1.5m clearance between grill and tent fabric. The NFPA 701 fire-retardant fabric provides additional safety. We recommend propane grills over charcoal for cleaner operation. Electric griddles are also fully compatible.

Q: Will stadium security allow this tent in the parking lot?

A: Most NFL and NCAA stadiums have designated tailgating policies. We provide all required documentation: PE-stamped wind calculations, NFPA 701 fire certificates, and setup footprint drawings. Contact your stadium's guest services for pre-approval — we can supply any additional documentation they require.

Q: Can I get the tent in my specific team colors?

A: Absolutely. Our UV printing reproduces any team color scheme with accurate matching. We maintain a database of official NFL and NCAA team Pantone colors. Custom printing adds approximately 5-7 days to production time and a small per-panel surcharge for licensed color matching.
