

## Modular Expandable Party Marquee Tent System Watertight Gutter Connection 3m Bay Aluminum Frame for Event Rental Fleets

Our Product Introduction

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: PartyMarquee Pro
- Certification: ISO 9001:2015, CE EN 13782, SGS, TUV Wind Tunnel
- Model Number: PM-MD300
- Minimum Order Quantity: 2 Bays
- Price: USD 450-780 / Bay (Size Dependent)
- Packaging Details: Color-Coded Frame Bag + Labeled Cover Bag per Bay on ISPM 15 Pallet with Loading Guide
- Delivery Time: Sample Bay: 3 Days / Bulk: 15-25 Days
- Payment Terms: T/T, L/C, PayPal
- Supply Ability: 10000 Bays per Month

### Product Specification

- Connection System: Patented Gutter With Silicone Seal
- Bay Sizes: 3x3m, 4x4m, 5x5m, 3x6m Modular
- Frame Material: 6061-T6 Extruded Aluminum
- Max Length Tested: 120m / 394FT Continuous
- Width Options: 3m, 4m, 5m, 6m, 8m, 10m
- Gutter Capacity: 50mm/hour Rainfall (IPX4)
- Wind Rating: 100km/h Standard / 120km/h Reinforced
- Bay Connection Time: 15 Minutes Per Bay (2-Person)
- Warranty: 10 Years Frame
- Highlight: **Modular party marquee tent system, Expandable aluminum frame marquee, Watertight gutter connection tent**

## Product Description

# Modular Expandable Party Marquee Tent System – Unlimited Configurations for American Event Professionals

Gutter Connection System | Mix & Match Sizes | Rapid Bay Expansion | 3m/10FT Modular Bays

## Key Features

Feature	Specification
Connection System	Patented Gutter Connection with Silicone Seal – Watertight Bay-to-Bay Linking
Bay Sizes	3x3m / 4x4m / 5x5m / 3x6m Modular Bays – Combine Any Configuration
Max Expansion	Unlimited Length Extension (Longest Supplied: 120m / 394FT continuous structure)
Width Options	3m / 4m / 5m / 6m / 8m / 10m (Single-Span & Multi-Span Available)
Accessory Compatibility	Sidewalls, Doors, Flooring, Lighting, HVAC – All Interchangeable Across Bays
Setup Flexibility	Start with 2 Bays, Expand Anytime – No Frame Modification Required

## Technical Specifications

Parameter	Value
Frame Material	6061-T6 Extruded Aluminum Profile (Anodized Silver or Powder Coated)
Roof Cover	850g/m <sup>2</sup> Double-Coated PVC (White Standard, Custom Colors Available)
Gutter System	Integrated Aluminum Gutter + PVC Rain Channel – 50mm/hour Rainfall Capacity
Eave Height	2.5m / 8.2FT (Standard), 3.0m / 9.8FT (High Eave Option)
Wind Load	100km/h (Standard), 120km/h (Reinforced)
Bay Connection Time	15 Minutes per Additional Bay (2-Person Team)

## Product Advantages & Selling Points

**Grow-As-You-Go Investment:** Start with a 2-bay system, add bays as your rental business grows – perfect for American event companies scaling operations.

**One Frame, Infinite Layouts:** Configure as L-shape, T-shape, U-shape, or straight corridor – adapt to any venue layout from US convention centers to Brazilian beach resorts.

**Reduced Inventory Cost:** Common frame components across all bay sizes mean fewer spare parts to stock – saves 30%+ on inventory for rental fleets.

**All-Weather Gutter:** Patent-pending watertight connection prevents rain leakage between bays – critical for tropical markets (Florida, Colombia, Caribbean).

**Fast Fleet Deployment:** 15-min bay connection time enables rapid event setup/teardown – maximize weekend rental slots.

## Certificates & Test Reports

Certificate	Scope	Status
ISO 9001:2015	Quality Management	Valid
CE EN 13782	EU Structural Safety	Passed
SGS Water Test	Gutter Connection Watertightness	IPX4 Rated
TÜV Wind Tunnel	120km/h Wind Resistance Verified	Passed

## Factory & Enterprise Strength

**6 CNC Machining Centers:** Precision aluminum extrusion cutting and drilling for perfect bay-to-bay alignment

**Patented Gutter Design:** 3 international patents covering the modular connection and watertight gutter system

**Americas Reference:** Largest single order: 500-bay system for a US national event rental chain

**Inventory Planning:** Free rental fleet optimization consultation based on your market and growth projections

## Application Cases

Project	Location	Configuration
State Fair Food Court	Texas, USA	120-bay L-shaped system covering 3,600m <sup>2</sup> for annual state fair
Beach Resort Wedding Village	Cancún, Mexico	45-bay connected system with 5 independent wedding pavilions
Carnival Market	Salvador, Brazil	200-bay straight corridor with side openings for carnival vendor market

## Packaging & Logistics

Aspect	Details
Bay Packaging	Color-coded frame bag + labeled cover bag per bay for quick inventory management
Container Efficiency	40FT HQ holds 40 standard bays (3x3m) – optimized loading guide included
Fleet Management	Barcode/QR labeling system available for rental fleet tracking

## Pre-Sales & After-Sales Service

### Pre-Sales

Free venue layout design with bay configuration recommendation  
 Rental fleet ROI calculator for your specific market  
 Sample bay dispatch for hands-on evaluation

### After-Sales

10-year frame warranty with bay expansion compatibility guarantee  
 Free gutter seal replacement kit with every expansion order  
 Remote video support for first-time modular assembly

## European Market Specification

Standard	Requirement	Status
EN 13782	Temporary Structures	Compliant
EN 1991-1-4	Eurocode Wind Actions	Verified
REACH	Chemical Compliance	Compliant

## FAQ

### Q1: Can I start with a small system and expand later?

Absolutely – that's the core advantage. Start with as few as 2 bays, and add more bays anytime. All components are backward-compatible. We guarantee expansion part availability for 10+ years.

### Q2: How watertight is the gutter connection in heavy tropical rain?

Our patented silicone-seal gutter system is IPX4 rated and tested in simulated 50mm/hour rainfall – equivalent to tropical storm conditions. No leakage between bays, even in Florida or Caribbean downpours.

### Q3: Can different bay sizes be connected together?

Yes, 3m, 4m, and 5m width bays can be connected via our universal gutter adapter. This allows you to create wider main halls with narrower corridor connections – ideal for complex event layouts.
