

Premium Backyard Party Tailgate Canopy Tent Instant Setup Pop-Up Aluminum Frame NFPA 701 USA

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: EcoTentPro
- Certification: NFPA 701, CPAI-84, ISO 9001:2015
- Model Number: ETP-PU1020-US
- Minimum Order Quantity: 2 Sets
- Price: USD 280-420 / Set
- Packaging Details: Individual wheeled roller carry bag with foam-padded interior, master carton of 2 units, palletized for LCL/FCL ocean freight
- Delivery Time: 3-7 working days after deposit
- Payment Terms: T/T, PayPal, Wire Transfer
- Supply Ability: 1,000 Sets per Month

Product Specification

- Tent Size (WxL): 10ft X 20ft (3.0m X 6.1m)
- Covered Area: 200 Sq Ft
- Peak Height: 11.2ft (3.4m) Maximum
- Side Height: 6.6ft / 6.9ft / 7.2ft (3-position Adjustable)
- Frame Material: Aluminum 6063-T5, Hexagonal Profile
- Top Material: 500D Polyester, PU Coated, NFPA 701
- Sidewall Material: 210D Oxford Fabric, PU Coated
- Fire Rating: NFPA 701 Test 1, CPAI-84
- Setup Time: 60 Seconds (2 Persons)
- Packing Weight: 68 Lbs (31 Kg)
- Carry Bag: 600D Polyester, Wheeled, Telescoping Handle
- Highlight: **Premium backyard party canopy tent, Instant setup pop-up aluminum frame tent, NFPA 701 USA party marquee tent**

Product Description

Product Overview

The **ETP-PU1020-US Instant Setup Pop-Up Canopy Tent** is the ultimate American outdoor lifestyle tent — purpose-built for backyard BBQs, tailgate parties, farmers market stalls, beach days, and weekend camping. At 10ft * 20ft (200 sq ft), it provides generous shade for 25-30 guests while setting up in just 60 seconds with two people. The commercial-grade hexagonal aluminum 6063-T5 frame with 3-position adjustable legs, combined with a 500D NFPA 701 certified polyester top with silver-coated underside (UPF 50+ UV protection), delivers the durability consumers expect and the fire safety compliance US venues require. Includes 6 removable sidewalls, wheeled roller bag, stake kit, and weight bags — everything needed for immediate use right out of the box.

Technical Specifications

Frame	
Frame Material	Aluminum 6063-T5, Hexagonal Profile, 1.2mm Wall
Frame Finish	Powder Coated, Black or White, 60µm
Leg Profile	Hexagonal 1.2" (30mm), 3-Position Height Adjustable
Scissor Mechanism	Reinforced Steel Rivets with Nylon Bushings
Leg Caps	Rubber Non-Slip with Stake Eyelets
Dimensions	
Width * Length	10ft * 20ft (3.0m * 6.1m)
Covered Area	200 sq ft (18.6 m²)
Peak Height	11.2ft (3.4m) at center peak
Side Height (3 positions)	6.6ft / 6.9ft / 7.2ft (2.0m / 2.1m / 2.2m)
Packed Size	52" * 12" * 12" (132cm * 30cm * 30cm)
Fabric	
Top Material	500D Polyester, PU 2000mm Coated, Silver Under-Coating
Sidewalls (6 pcs included)	210D Oxford Fabric, PU Coated, White
Fire Rating	NFPA 701-2019 Test 1, CPAI-84 Section 6
UV Protection	UPF 50+, 98% UV Block, Silver Reflective Underside
Waterproof	PU 2000mm, Taped Seams
Performance	
Wind Rating	Up to 40 mph (with stakes + weight bags)
Setup Time	60 seconds (2 persons)
Packing Weight	68 lbs (31 kg) complete set

Key Advantages & Selling Points

↳ True 60-Second Setup

Patented central hub scissor mechanism expands the frame in one smooth motion — no assembly of individual poles. Two people: lift frame, pull outward, lock legs. Done in 60 seconds. Take-down is equally fast: unlock, push inward, fold. The hexagonal aluminum profile is 30% stronger than round tube designs at the same weight.

NFPA 701 Fire Certified

Unlike 95% of pop-up canopies on Amazon and big-box retail, the 500D polyester top passes NFPA 701 Test 1 and CPAI-84 Section 6. This matters for: farmers markets requiring fire certs, school events, municipality-permitted events, and commercial food vendors. Fire certificate included with every tent.

* UPF 50+ Silver Coating

The silver-coated underside of the 500D top reflects 98% of UV radiation and significantly reduces heat buildup under the canopy — typically 10-15°F cooler than standard white-canopy pop-ups. Essential for all-day outdoor events in Texas, Arizona, Florida, and Southern California.

Complete Package, Ready to Use

Includes everything: frame, 500D top, 6 removable sidewalls (2 solid end walls, 2 window walls, 2 zipper door walls), 8 steel ground stakes, 4 weight bags (fill with sand/water on site), rope kit, and premium 600D wheeled roller bag with telescoping handle. No accessories to buy separately.

US Lifestyle Versatility

Tailgating at NFL/college games, backyard graduation parties, farmers market stalls, beach canopy, craft fair booth, outdoor wedding buffet station, camping mess tent, car show display, sports team sideline shelter, flea market booth — one tent, endless American outdoor applications.

Retail-Ready Packaging

Individual color box with full-color lifestyle photography, UPC barcode, and English/Spanish manual — designed for US retail shelves (Home Depot, Walmart, Costco, Ace Hardware). Master carton of 2 units for warehouse club format. Pallet configs available for distribution center delivery.

Production Process

Hexagonal Aluminum Extrusion

6063-T5 billets extruded through custom hexagonal die for optimal strength-to-weight ratio. Precision drawn to 1.2" diameter with 1.2mm consistent wall thickness. Cut to length with laser measurement ($\pm 0.5\text{mm}$). Powder coated in electrostatic booth at $60\mu\text{m}$.

Scissor Frame Assembly

Steel scissor arms stamped from HRPO steel, zinc-plated, with nylon bushings at every pivot point. Riveted on automated assembly line with pneumatic rivet guns. Every frame cycle-tested 500 times (open/close) on endurance test rig — simulating 5+ years of weekly use.

500D Fabric Production

500D polyester woven with UV-stabilized yarn. PU coating applied at 2000mm on reverse side. Silver reflective coating applied on interior face — both coatings cured in continuous oven at 160°C . NFPA 701 fire retardant treatment applied as final bath process for uniform coverage.

Cut & Sew

Computer-nested cutting on automated tables. All seams double-stitched with UV-resistant polyester thread (Tex 60). Velcro attachment points for sidewalls reinforced with bar-tack stitching (28 stitches per attachment). Corner stress points reinforced with triple-layer fabric patches.

Quality Assurance

100% inspection: frame opened and closed 3 times, leg locks tested, fabric fitted and tension checked, zippers operated 10 times, sidewalls attached/detached. Random sampling (AQL 2.5): water spray test (1 hour), wind test (40 mph sustained with weight bags), UV meter verification of UPF rating.

Retail Packaging & Export

Individual color box with die-cut foam interior. Wheeled roller bag included inside retail box. Master carton: 2 units per carton. Pallet: 12 master cartons (24 units) per standard pallet. Container: 480 units per 40ft HQ. US Customs ready: NFPA 701 certs, CPSC compliance, ISPM 15 pallets.

Factory & Company Strength

US Consumer Market Manufacturing Partner

Certifications

Pre-Sales & After-Sales Service

Pre-Sales	After-Sales
Sample unit shipped to US address for evaluation	1-year comprehensive warranty

Application Cases

NFL & College Football Tailgating
Backyard BBQs & Pool Parties
Farmers Market & Food Vendor Stalls
Craft Fairs & Art Show Booths
Beach Days & Lakeside Camping
Youth Sports Team Sideline Shelter

FAQ

Q1: How is this different from the \$99 pop-up canopies on Amazon?

Six critical differences: (1) NFPA 701 fire certified top vs untested fabric. (2) Hexagonal aluminum frame (30% stronger) vs cheap round steel. (3) 500D polyester top with silver UPF 50+ coating vs thin 150D PE. (4) 6 sidewalls included vs sold separately. (5) Wheeled roller bag included vs no bag. (6) Commercial-grade construction designed for 500+ uses vs consumer grade that fails after 10-20 uses. This is the canopy that vendors, rental companies, and serious tailgaters buy — not the disposable big-box version.

Q2: Will this canopy pass fire inspection at my farmers market?

Yes. The NFPA 701 fire certificate is included with your tent — this is the standard most US farmers markets and municipality events require for vendor canopies. The lot number on your canopy's care label matches the fire certificate. Keep the certificate with your market paperwork and present it at vendor check-in.

Q3: Can one person set this up alone?

The 10x20ft size requires 2 people for safe setup due to the frame span. One-person setup is possible with practice (start from the center and walk outward) but we strongly recommend 2 people to prevent frame twisting. The 10x10ft version is fully one-person capable. Setup video included via QR code on the box.

Q4: How does it hold up in wind?

With all 8 stakes driven and 4 weight bags filled (sand or water, approximately 40 lbs each), the canopy is stable in winds up to 40 mph. For gusty conditions, we recommend: lower legs to minimum height, use all stakes AND weight bags, attach additional guy ropes (included), and remove sidewalls to reduce wind profile. Never leave the canopy unattended in

forecasted high winds.

Q5: Can I customize with my logo or branding?

Yes! OEM/private label options: custom color frame (MOQ 100 units), custom printed top with your logo/brand (MOQ 50 units), custom printed sidewalls (MOQ 50 units), custom retail packaging with your brand (MOQ 200 units), custom color tops (MOQ 100 units). For smaller quantities, we offer heat-transfer logo application on standard white tops — MOQ 10 units.

Q6: What's the wholesale pricing structure?

Tiered pricing: 2-9 units (\$420/unit), 10-49 units (\$365/unit), 50-99 units (\$320/unit), 100-499 units (\$295/unit), 500+ units (contact for distributor pricing). All prices FOB Shenzhen. Container pricing (480 units per 40ft HQ) offers the best per-unit economics. LCL shipping available for smaller orders. Net 30 payment terms available for established US businesses with credit reference.
