

## Monsoon Proof Party Marquee Tent Waterproof PVC Aluminum Frame Thailand Outdoor Event Canopy Gazebo

### Our Product Introduction

for more products please visit us on [marquees-tent.com](http://marquees-tent.com)

#### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: ECER
- Certification: TUV, ISO 9001:2015
- Model Number: PMT-TH01-MP
- Minimum Order Quantity: 1 Set
- Price: USD 500-3000 / Set
- Packaging Details: Moisture-proof PE inner liner with desiccant, heavy-duty woven bag, steel frame in export-grade carton with corner reinforcement
- Delivery Time: 7-15 working days after order confirmation
- Payment Terms: T/T, L/C, PayPal, Western Union
- Supply Ability: 500 Sets per Month

#### Product Specification

- Frame Material: 6061-T6 Aluminum Alloy (Anti-Corrosion Anodized)
- Fabric Material: 850g/m² PVC Laminated Fabric
- Waterproof Rating: 100% Waterproof (EN 20811 Certified)
- UV Protection: UPF 50+ UV Block
- Wind Resistance: Up To 90km/h With Monsoon Anchoring
- Roof Design: Steep Pitch 30° Enhanced Drainage
- Anti-Corrosion Treatment: 20µm Anodized Coating
- Color Options: White, Beige, Blue, Custom Colors
- Highlight: **Monsoon proof party marquee tent, Waterproof PVC outdoor event canopy, Aluminum frame Thailand gazebo tent**

### Our Prod

#### Product Description

Our **Monsoon Proof Party Marquee Tent** is purpose-built for Thailand challenging tropical climate, where monsoon season brings intens

rainfall exceeding 1,500mm from May through October. Featuring an enhanced 30° steep-pitch roof for rapid rainwater runoff, 850g/m² PVC fabric with triple heat-welded seams, and 20µm anti-corrosion anodized aluminum frame, this tent delivers uncompromising weather protection for year-round outdoor events across Thailand — from Bangkok corporate gatherings to Chiang Mai garden parties and Phuket beach celebrations.

**Engineered for Thailand Monsoon Season:** 30° steep-pitch roof sheds water 40% faster than standard designs. Triple-welded seams with EN 20811 certification ensure zero leakage during Thailand heaviest tropical downpours. Anti-corrosion anodizing protects against Thailand year-round high humidity.

**Monsoon-Ready Waterproof Design**

850g/m² PVC fabric with triple heat-welded seams and 30° steep-pitch roof. EN 20811 certified 100% waterproof — tested under 200mm/h simulated rainfall for Thailand monsoon conditions.

**UPF 50+ UV Protection**

Advanced UV-stabilized coating blocks 98% of harmful rays. Essential for Thailand intense tropical sun with UV index regularly exceeding 12 during hot season.

**Anti-Corrosion Frame**

20µm anodized 6061-T6 aluminum frame resists corrosion in Thailand high-humidity coastal environments. Ideal for seaside venues in Pattaya, Phuket, and Krabi.

**90km/h Wind Resistance**

Reinforced frame connectors and monsoon-grade ground anchoring system withstands gusts up to 90km/h during Thailand seasonal storms and squalls.

**Enhanced Drainage Roof**

30° steep-pitch roof profile with integrated gutter channels rapidly sheds rainwater — no pooling, no sagging, no dripping during extended Thailand monsoon downpours.

**Full Customization Available**

OEM/ODM services: custom logo printing, Pantone color matching, size modifications. Perfect for Thailand event companies building branded rental fleets.

| Parameter         | Specification                          |
|-------------------|----------------------------------------|
| Frame Material    | 6061-T6 Aluminum Alloy (20µm Anodized) |
| Fabric Material   | 850g/m² PVC Laminated Fabric           |
| Waterproof Rating | 100% Waterproof (EN 20811 Certified)   |
| UV Protection     | UPF 50+ (Blocks 98% UV Radiation)      |
| Wind Resistance   | Up to 90km/h (Beaufort Scale 10)       |
| Roof Pitch        | 30° Steep-Pitch Enhanced Drainage      |
| Frame Diameter    | 50mm / 64mm Main Pole Options          |
| Connector Type    | Reinforced Steel-Core Aluminum Joints  |
| Fire Rating       | B1/M2 Flame Retardant                  |
| Temperature Range | -20°C to +70°C                         |

Rigorous 12-step manufacturing process with CNC precision technology and TUV-certified quality checkpoints.

1

Raw Material Inspection

Incoming 6061-T6 aluminum billets and 850g/m² PVC fabric tested for tensile strength, UV resistance, fire retardancy, and anti-corrosion properties.

2

CNC Precision Tube Cutting

Aluminum profiles cut to ±0.1mm tolerance using 5-axis CNC machining centers ensuring perfect frame geometry and connector fit.

3

CNC Drilling & Chamfering

Connector holes precision-drilled and chamfered by CNC machines for smooth assembly and consistent structural alignment.

4

20µm Anti-Corrosion Anodizing

Enhanced 20µm anodized coating applied for superior corrosion resistance in Thailand coastal and high-humidity environments.

5

Fabric CNC Cutting

PVC fabric precision-cut by CNC fabric cutter with steep-pitch roof panel geometry for optimal rainwater runoff performance.

6

Triple Heat Welding Seams

All fabric seams permanently sealed with three-pass high-frequency heat welding — 3x stronger than standard single-weld seams.

7

UV Stabilization Treatment

Industrial UV stabilizers applied and tested under 1000+ hours accelerated weathering simulation for Thailand equatorial sun exposure.

3

**Frame Pre-Assembly Check**

Each frame dry-assembled and inspected for connector function, anodizing quality, and structural alignment.

9

**Monsoon Rain Simulation Test**

Complete tent undergoes 45-minute pressurized water spray test at 200mm/h — simulating Thailand monsoon conditions — to verify zero leakage.

10

**TUV Certification Inspection**

Independent TUV Rheinland verification of EN 13782, EN 15619, EN 20811, and fire retardancy standards.

11

**Final Quality Audit**

100% inspection of all welded seams, frame finish, connector function, and accessory completeness before packaging.

12

**Moisture-Proof Export Packaging**

Professional packaging with moisture-proof PE liner, silica gel desiccant, and reinforced export cartons for Thailand sea freight.

**15,000m² Manufacturing Facility**

State-of-the-art production base with dedicated aluminum processing, CNC machining, fabric welding, and assembly workshops under one roof.

**Advanced CNC Equipment**

Equipped with 5-axis CNC machining centers, CNC fabric cutters, high-frequency welding machines, and automated anodizing line for precision manufacturing.

**10+ Years Industry Expertise**

Over a decade of marquee tent manufacturing experience serving 50+ countries including Thailand, Vietnam, Malaysia, and Indonesia with proven tropical climate solutions.

**500 Sets Monthly Capacity**

Scalable production with 500+ sets monthly output, capable of handling large Thailand event company orders and hospitality group contracts.

**TUV Certified Quality**

Products tested and certified by TUV Rheinland to EN 13782 and EN 15619 international standards. ISO 9001:2015 quality management system.

Thailand Market Specialist

Dedicated Thailand account team with local market expertise, understanding of monsoon climate requirements, and after-sales support network.

- TUV Rheinland Certified
- ISO 9001:2015
- B1/M2 Fire Retardant
- EN 20811 Waterproof
- \* UPF 50+ Test Report
- Wind Load 90km/h Test
- UV Aging 1000h+ Report
- EN 13782 Compliant
- Salt Spray Corrosion Test

Complete certification package and third-party test reports provided for Thailand import compliance and venue approval. Pre-shipment inspection by TUV, SGS, or Bureau Veritas welcomed.

| Service Item             | Coverage                                                     | Response Time    |
|--------------------------|--------------------------------------------------------------|------------------|
| Aluminum Frame Structure | 5-year warranty (manufacturing defects, corrosion)           | 48-Hour Response |
| PVC Fabric Cover         | 3-year warranty (UV degradation, delamination, seam failure) | 48-Hour Response |
| Connectors & Fittings    | 5-year warranty (breakage, function failure)                 | 48-Hour Response |
| Anchoring System         | 5-year warranty (corrosion, structural failure)              | 48-Hour Response |
| Spare Parts Supply       | 10-year guaranteed spare parts availability                  | 3-Day Dispatch   |
| Technical Support        | Lifetime free technical consultation                         | 24-Hour Response |

Free Venue Consultation

Expert team assesses your Thailand event venue, monsoon exposure, ground conditions, and usage frequency to recommend optimal tent configuration and anchoring solution.

3D Design & Customization

Free 3D rendering service for custom colors, logo placement, and branding. Visual confirmation and digital proof approval before production.

Thailand Logistics Support

Partnership with Thailand freight forwarders for seamless delivery to Bangkok, Chiang Mai, Phuket, and all major provinces. Customs clearance and import documentation included.

### Installation Training & Support

HD assembly video, printed Thai/English bilingual manual, and real-time video call guidance. On-site installation team available for large Thailand projects.

### 30-Day Replacement Guarantee

Free express replacement for any manufacturing defect within 30 days of delivery. Priority air shipping to Thailand for urgent event timelines.

### Thailand Dedicated Hotline

WhatsApp/Line/WeChat support for Thailand clients. Response within 2 hours during Thailand business hours (ICT, GMT+7).

#### Q: Can this tent withstand Thailand heavy monsoon rains?

**A:** Yes, this is our flagship monsoon-proof model. The 30° steep-pitch roof rapidly sheds rainwater, triple heat-welded seams prevent any leakage, and EN 20811 waterproof certification confirms 100% waterproof performance. We test every tent under 200mm/h simulated rainfall — equivalent to Thailand's heaviest monsoon conditions.

#### Q: Is the aluminum frame suitable for Thailand coastal areas like Phuket and Pattaya?

**A:** Absolutely. Our 20µm enhanced anodized coating provides superior corrosion resistance in coastal salt-air environments. We also offer an optional electrophoretic coating upgrade for extreme marine exposure. Salt spray test reports available upon request.

#### Q: What is the minimum order quantity for Thailand?

**A:** We accept orders starting from just 1 set. Whether you need a single tent for a private party in Bangkok or 100 sets for a Thailand event rental fleet, we are happy to accommodate your requirements.

#### Q: Do you provide Thai language assembly instructions?

**A:** Yes, we provide bilingual Thai/English assembly manuals with step-by-step illustrations. HD video guides with Thai subtitles are also available. Live video call support can be conducted with Thai-speaking staff assistance.

#### Q: What certifications do you provide for Thailand import?

**A:** Our tents are TUV Rheinland certified to EN 13782 and EN 15619 standards. We provide B1/M2 fire retardant certificates, EN 20811 waterproof test reports, UPF 50+ UV test reports, salt spray corrosion test reports, and ISO 9001:2015 certification. Complete documentation for Thailand customs clearance.

#### Q: How long is the warranty and what does it cover?

**A:** 5-year warranty on the aluminum frame and structural components, 3-year warranty on PVC fabric cover including seam integrity. Covers manufacturing defects, corrosion, UV degradation, and delamination. Spare parts guaranteed available for 10 years.

#### Q: What are the shipping options and delivery times to Thailand?

**A:** Sea freight to Bangkok/Laem Chabang port takes 7-10 days. Air freight 3-5 days for urgent orders. We offer both FOB and DDP door-to-door delivery, including Thai customs clearance, import duties, and last-mile delivery to all provinces.

Contact our Thailand specialist for detailed information, from 3D design and production to event execution and timely setup.
