Outdoor ceremony tent TUV certified**

Product Description

Transform Indonesian Weddings into Unforgettable Celebrations — Elegant Luxury Marquee with Premium Finishes

Model: FANT-IND-WD01 | Made in Guangdong, China | TUV Certified

Product Overview

Our **Luxury Wedding Marquee Tent Indonesia Elegant White PVC Event Pavilion Aluminum Frame TUV Certified for Outdoor Ceremony Reception** is specifically engineered for the **Indonesian market**, taking into account the tropical climate conditions including high humidity, intense UV exposure, and seasonal heavy rainfall. Constructed with premium aluminum alloy frame and high-density PVC fabric, this tent delivers exceptional durability, weather resistance, and aesthetic appeal for various outdoor applications across Indonesia — from Jakarta to Bali, Surabaya to Medan.

With **10+ years of export experience** serving Southeast Asian markets, we understand the unique requirements of Indonesian customers: competitive pricing without compromising quality, fast delivery to major ports (Tanjung Priok, Tanjung Perak), and comprehensive after-sales support. Every tent is backed by our exclusive **5-Year Structural Warranty**.

Technical Specifications

Parameter	Specification
Frame Material	Aluminum Alloy 6061-T6, White Powder Coated
PVC Fabric	850g/m² Premium White PVC, Double-Side Lacquered
Optional Roof	Transparent PVC Skylight / Opaque White
Sidewall Configuration	Full White Walls / Window Walls / Clear PVC Walls
Door Style	Zippered Roll-Up Door / French Window Style
Eave Height	Customizable (Standard: 2.5m / 3.0m)
Peak Height	Customizable (Standard: 3.5m / 4.0m)
UV Protection	UPF 50+, Maintains Cool Interior
Wind Resistance	Up to 80 km/h with Proper Anchoring
Decoration Ready	Internal Lining Hooks, Chandelier Mount Points
Flooring Compatible	Compatible with Wooden/Plastic Flooring Systems
Warranty	5 Years on Frame, 2 Years on PVC Cover

Product Advantages & Selling Points

Elegant Wedding Aesthetic: Pure white powder-coated aluminum frame and premium white PVC fabric create a sophisticated, clean look perfect for Indonesian wedding ceremonies and receptions — from traditional to modern styles.

Customizable Interior Ambiance: Built-in hooks for fabric draping, chandelier mounting points, and compatible with flooring systems allow complete transformation into a luxurious wedding hall.

Transparent Skylight Option: Optional transparent PVC roof panels flood the interior with natural daylight — ideal for daytime wedding ceremonies. Opaque option available for evening events requiring controlled lighting.

Tropical Wedding Ready: Waterproof and UV-resistant materials protect guests from sudden tropical rain while keeping the interior cool and comfortable throughout the celebration.

Quick Wedding Venue Solution: Create a beautiful wedding venue anywhere — hotel gardens, beachfront locations, private residences. Setup in hours, dismantle after the event.

Indonesian Market Proven: Trusted by Indonesian wedding organizers and event planners. Factory-direct supply chain ensures competitive pricing for rental businesses and wedding venues.

TUV Certification & Quality Testing

Certifications

- TUV SUD Certified (Product Safety)
- ISO 9001:2015 Quality Management System
- EN 13782 Temporary Structure Compliance
- CE Marking (European Conformity)
- SGS Material Test Reports Available

Rigorous Testing

- UV Aging Test (ASTM G154) — 3000+ hours
- Water Penetration Test (AATCC 127) — Zero leakage
- Wind Load Test — Up to 100 km/h (Beaufort 10)
- Frame Load Test — 150% rated capacity
- Tensile Strength Test — PVC fabric 2800N/5cm
- Fire Retardant Test (NFPA 701 / DIN 4102 B1)

Manufacturing Excellence — CNC Precision Production

Step 1: CNC Aluminum Profile Cutting

Our imported **CNC machining centers** precisely cut aluminum alloy 6061-T6 profiles to exact specifications with $\pm 0.5\text{mm}$ tolerance, ensuring perfect frame alignment and structural integrity.

Step 2: CNC Punching & Drilling

Automated CNC punching machines create precise connection holes in aluminum tubes, guaranteeing consistent connector fit and rapid on-site assembly without any rework.

Step 3: High-Frequency PVC Welding

Industrial high-frequency welding machines bond PVC panels with seamless, waterproof joints. Every seam is pressure-tested to ensure zero water ingress — critical for Indonesia's rainy season.

Step 4: Surface Treatment & Coating

Aluminum frames undergo anodizing or powder coating treatment for superior corrosion resistance, essential for Indonesia's coastal and high-humidity environments.

Step 5: Quality Inspection & Assembly

Each tent undergoes a full pre-assembly inspection before packaging. Our QC team verifies every frame connection, fabric tension, zipper function, and accessory completeness.

Step 6: Export-Grade Packaging

Products are packed in reinforced export cartons with protective foam and moisture-proof wrapping, palletized for safe container shipping to Indonesian ports.

Our Strengths

- Strategically located in Guangdong, China — close to major export ports (Shenzhen, Guangzhou)
- Dedicated **R&D team** continuously improving tent designs based on market feedback from Southeast Asia
- Long-term partnerships with Indonesian importers and event companies — we understand local market demands
- Lean manufacturing with **CNC automation** ensures consistent quality and competitive pricing
- Comprehensive inventory of spare parts ensures fast replenishment for Indonesian distributors

Comprehensive Service Package

Pre-Sales Service

- Free professional consultation & product recommendation
- Custom size & color design based on your requirements
- 3D rendering & layout planning for your event space
- Sample available for quality evaluation before bulk order
- Detailed quotation within 24 hours
- Indonesia market insights & selling advice

After-Sales Service

- 5-Year Structural Warranty** on aluminum frame
- 2-Year warranty on PVC fabric covers
- Free replacement parts for manufacturing defects
- Installation video guide & printed manual included
- Remote installation support via video call
- Dedicated account manager for Indonesian clients

Frequently Asked Questions (FAQ)

Q: Can the wedding tent be customized with specific decorations?

A: Yes! We provide internal hooks, drape attachment points, and chandelier mounts. The white frame and fabric serve as a perfect canvas for any wedding decoration theme — traditional Indonesian, modern minimalist, or lavish floral arrangements.

Q: How many guests can a single wedding tent accommodate?

A: Our wedding tents are modular and scalable. A standard configuration can seat 100-500 guests. Multiple tents can be joined together to create a larger venue for 1000+ guests. Contact us for a layout plan based on your guest count.

Q: Do you offer complete wedding tent packages?

A: Yes, we offer complete packages including the tent frame, PVC cover, sidewalls, doors, anchoring kit, and optional accessories (lighting trusses, lining drapes, flooring). We can recommend the right package for your Indonesian wedding venue.

Q: How does the white finish hold up in Indonesia's climate?

A: Our white powder coating is UV-stabilized and anti-yellowing tested for 3000+ hours. The PVC fabric maintains its bright white appearance even after years of tropical sun exposure. Regular cleaning with mild soap and water keeps it looking new.

Q: Can I order a sample before placing a bulk order for my wedding business?

A: Absolutely. We encourage sample orders so you can evaluate the quality firsthand. We can ship a small sample tent to Indonesia within 5-7 business days via air freight. Many Indonesian wedding rental companies start with a sample order.
