

Commercial Exhibition Marquee Tent Indonesia Branded Pavilion Modular Aluminum TUV Certified for Corporate Trade Fair

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: WNRLN
- Certification: TUV SUD, ISO 9001:2015, CE, SGS, NFPA 701, DIN 4102 B1
- Model Number: PMT-IND-CE01
- Minimum Order Quantity: 10 Pieces
- Price: USD 180-850 / Piece
- Packaging Details: WNRLN branded export-grade corrugated carton with protective foam insert and moisture-proof wrapping, palletized for container shipping
- Delivery Time: 7-15 working days after order confirmation
- Payment Terms: T/T, L/C, Western Union
- Supply Ability: 5000 Pieces per Month

Product Specification

- Highlight: Commercial exhibition marquee tent TUV certified, Modular aluminum pavilion trade fair tent, Branded corporate marquee tent Indonesia

Product Description

Elevate Your Brand Presence in Indonesia — Premium Commercial Exhibition Tent with Modular Design & Corporate-Grade Finish

Model: PWT-ND-CER | Made in Guangzhou, China | TUV Certified

Product Overview

Our **Commercial Exhibition Marquee Tent Indonesia Large Capacity Branded Event Pavilion Modular Aluminum Frame TUV Certified for Corporate Product Launch Trade Fair** is specifically engineered for the **Indonesian market**, taking into account the tropical climate conditions including high humidity, intense UV exposure, and seasonal heavy rainfall. Constructed with premium aluminum alloy frame and high-density PVC fabric, this tent delivers exceptional durability, weather resistance, and aesthetic appeal for various outdoor applications across Indonesia — from Jakarta to Bali, Surabaya to Medan.

With **10+ years of export experience** serving Southeast Asian markets, we understand the unique requirements of Indonesian customers: competitive pricing without compromising quality, fast delivery to major ports (Tanjung Priok, Tanjung Perak), and comprehensive after-sales support. Every tent is backed by our exclusive **5-Year Structural Warranty**.

Technical Specifications

Parameter	Specification
Frame Material	Aluminum Alloy 6061-T6, Premium Brushed Silver Finish
PVC Fabric	850g/m² Premium PVC, High-Gloss Lacquered Finish
Modular System	Extendable Bay Design (5m/10m/15m/20m Bays)
Eave Height	2.7m / 3.5m / Custom
Peak Height	4.2m / 5.0m / Custom
Branding Options	Full Digital Print Roof & Walls / Banner Rails
Flooring	Compatible with Raised Flooring & Carpet Systems
Interior Features	Integrated Cable Management, Lighting Truss Compatible
Climate Control	AC Compatible Ports, Ridge Ventilation System
UV Protection	UPF 50+ with Anti-Glare Interior Coating
Wind Resistance	Up to 100 km/h (Beaufort 10)
Warranty	5 Years on Frame, 2 Years on PVC Cover

Product Advantages & Selling Points

Premium Brand-Building Pavilion: High-gloss lacquered PVC fabric with brushed silver aluminum frame creates a prestigious exhibition presence. Full digital printing transforms your tent into a powerful brand statement at Indonesian trade fairs and corporate events.

Modular Expandable Architecture: Bay-based modular design allows you to start with a standard configuration and expand as your exhibition needs grow. Easily connect multiple bays to create showrooms of any size for ICE BSD, JIExpo Kemayoran, or Grand City Surabaya events.

Corporate-Ready Infrastructure: Integrated cable management channels, air conditioning ports, and lighting truss compatibility provide a professional-grade infrastructure for premium product launches, automotive showcases, and VIP corporate hospitality suites.

360° Branding Canvas: Full digital print capability on roof panels, sidewalls, and gable ends. Your brand logo, corporate

colors, product imagery, and marketing messages are reproduced in vibrant, high-resolution quality that commands attention at crowded Indonesian trade exhibitions.

Climate-Controlled Comfort: Designed for Indonesia's tropical conditions with ridge ventilation, AC compatibility, and UPF 50+ anti-glare interior coating. Keep VIP clients and exhibition staff comfortable even during Jakarta's hottest exhibition days.

Multi-Event Versatility: Beyond exhibitions, this premium tent excels at corporate product launches, dealer meetings, automotive roadshows, and brand activation events across Indonesia. One investment, unlimited branding opportunities.

TUV Certification & Quality Testing

Certifications

- TUV SUD Certified (Product Safety)
- ISO 9001:2015 Quality Management System
- EN 13782 Temporary Structure Compliance
- CE Marking (European Conformity)
- SGS Material Test Reports Available

Rigorous Testing

- UV Aging Test (ASTM G154) — 3000+ hours
- Water Penetration Test (AATCC 127) — Zero leakage
- Wind Load Test — Up to 100 km/h (Beaufort 10)
- Frame Load Test — 150% rated capacity
- Tensile Strength Test — PVC fabric 2800N/5cm
- Fire Retardant Test (NFPA 701 / DIN 4102 B1)

Manufacturing Excellence — CNC Precision Production

Step 1: CNC Aluminum Profile Cutting

Our imported **CNC machining centers** precisely cut aluminum alloy 6061-T6 profiles to exact specifications with $\pm 0.5\text{mm}$ tolerance, ensuring perfect frame alignment and structural integrity.

Step 2: CNC Punching & Drilling

Automated CNC punching machines create precise connection holes in aluminum tubes, guaranteeing consistent connector fit and rapid on-site assembly without any rework.

Step 3: High-Frequency PVC Welding

Industrial high-frequency welding machines bond PVC panels with seamless, waterproof joints. Every seam is pressure-tested to ensure zero water ingress — critical for Indonesia's rainy season.

Step 4: Surface Treatment & Coating

Aluminum frames undergo anodizing or powder coating treatment for superior corrosion resistance, essential for Indonesia's coastal and high-humidity environments.

Step 5: Quality Inspection & Assembly

Each tent undergoes a full pre-assembly inspection before packaging. Our QC team verifies every frame connection, fabric tension, zipper function, and accessory completeness.

Step 6: Export-Grade Packaging

Products are packed in reinforced export cartons with protective foam and moisture-proof wrapping, palletized for safe container shipping to Indonesian ports.

Factory & Enterprise Strength

Our Strengths

- Strategically located in Guangdong, China — close to major export ports (Shenzhen, Guangzhou)
- Dedicated **R&D team** continuously improving tent designs based on market feedback from Southeast Asia
- Long-term partnerships with Indonesian importers and event companies — we understand local market demands
- Lean manufacturing with **CNC automation** ensures consistent quality and competitive pricing
- Comprehensive inventory of spare parts ensures fast replenishment for Indonesian distributors

Comprehensive Service Package

Pre-Sales Service

- Free professional consultation & product recommendation
- Custom size & color design based on your requirements
- 3D rendering & layout planning for your event space
- Sample available for quality evaluation before bulk order
- Detailed quotation within 24 hours
- Indonesia market insights & selling advice

After-Sales Service

- 5-Year Structural Warranty** on aluminum frame
- 2-Year warranty on PVC fabric covers
- Free replacement parts for manufacturing defects

Installation video guide & printed manual included
Remote installation support via video call
Dedicated account manager for Indonesian clients
Spare parts available for express shipping to Indonesia

Frequently Asked Questions (FAQ)

Q: Can the tent be branded with our company logo and colors?

A: Absolutely. We offer full digital printing services using eco-solvent ink technology. Your company logo, brand colors, product images, and marketing messages can be printed directly on roof panels, sidewalls, and gable ends. The high-gloss PVC fabric ensures vibrant, professional results that stand out at Indonesian trade exhibitions.

Q: How does the modular bay system work for expanding the tent?

A: Our modular system uses standard bay widths (typically 5 meters). You can start with a 5m x 5m configuration and later add additional bays to create 5x10m, 5x15m, or larger spaces. The aluminum frame is designed with connector points that make expansion straightforward without replacing existing components.

Q: Is this tent suitable for major Indonesian exhibition venues like JIExpo or ICE BSD?

A: Yes, our commercial exhibition tents meet the requirements of major Indonesian exhibition venues including JIExpo Kemayoran (Jakarta), ICE BSD City (Tangerang), and Grand City Convention Center (Surabaya). We can provide structural calculations and fire certificates required by venue management.

Q: Do you offer installation and dismantling services for exhibitions in Indonesia?

A: For large exhibition projects in Indonesia, we can arrange professional installation teams familiar with major exhibition venue protocols. Our team handles setup, safety inspection, on-site adjustments during the event, and dismantling after the exhibition concludes.

Q: What is the lead time for a customized branded exhibition tent?

A: Standard models ship within 7-15 working days. Custom-branded tents with digital printing require an additional 5-7 working days for artwork confirmation and production. For urgent exhibition deadlines, we offer express production and air freight options to Indonesia.
